

To: The National Mediation Board
Docket Number C-6964

I **support** the NMB's proposed **change** to the NMB Election Rules.
I want every single vote to count. That's Democracy. That's the American way.

The current rules count those who do not even bother to vote as votes against union representation. Those rules are unfair, undemocratic and outdated.

Representation elections for airline and railroad workers should be decided by the **majority of employees voting**, just like every other election in America today.
