LETTER OF TRANSMITTAL

NATIONAL MEDIATION BOARD, OFFICE OF THE CHAIRMAN, Washington, D. C., November 1, 1939. To the Senate and House of Representatives of the United States of

America in Congress assembled: Pursuant to the provisions of section 4, second, of Public, No. 442, approved June 21, 1934, I have the honor to submit the Fifth Annual Report of the National Mediation Board for the fiscal year ended June 30, 1939, together with the annual report of the National Railroad Adjustment Board, as required by section 3, first, (v), of the same act.

> OTTO S. BEYER, Chairman.

FIFTH ANNUAL REPORT

OF THE

NATIONAL MEDIATION BOARD

I. SUMMARY AND CONCLUSIONS

1. GENERAL

The end of the fiscal year 1939 marks the fifth year of the existence of the National Mediation Board. This report is, therefore, the fifth annual report of the present Board, which was created by the 1934 amendments to the original act of 1926.

The Board is pleased to be able to observe again that during the fiscal year 1939 there were no interruptions to the service rendered by the railroads due to labor difficulties. One strike of certain airline employees on one air line did occur, however, after applicable steps provided by the Railway Labor Act to consummate agreements on the matters at issue between the air line and the employees concerned had been exhausted. On the whole, the labor relations of the rail and air carriers have been further improved and stabilized. Not only have these carriers and their employees definitely benefited as a result, but the people of the country, their industry, business, and commerce, have been able to count on reliable, safe, and efficient transportation service free from interruptions due to labor troubles, all as contemplated by the Railway Labor Act.

The following subdivisions of this section, which summarize and briefly outline the facts presented in the subsequent sections of the annual report, indicate the extent to which the Railway Labor Act and the agencies created by it have contributed to this result.

2. REPRESENTATION DISPUTES

The Railway Labor Act in essence provides that the so-called labor standards, i. e., rates of pay, rules, and working conditions of the railroad and air-line carriers, shall be established by agreement directly between the carriers and their employees. To the end that these parties may be properly enabled to confer, negotiate, and make such agreements with one another, the act further provides that they shall select spokesmen or representatives for this purpose. The representatives of the employees as a whole on each carrier shall be designated, according to the act, by crafts or classes such as the employees themselves by general custom and practice over the years may have developed.

A study of the policy underlying the Railway Labor Act clearly reveals two important features, namely: First, that the responsibility for determining the rates of pay, rules, and working conditions of rail and air-line employees is the responsibility of the principals immediately concerned with these matters, i. e., the railroads and the air lines on the one hand and their employees on the other; and, second, so that this objective may be effectively achieved, the carriers and their employees both shall designate representatives prepared and authorized to confer, negotiate, and consummate specific agreements.

In the main, practically all of the principal carriers by rail and their employees have complied with the basic mandate of the Railway Labor Act as expressed above. Where opportunity still existed to establish representation for employees and make labor agreements, as for example in the cases of dining-car employees and railroad station ushers or porters (usually called "red caps"), the record for the year reveals further progress. As matters stood at the close of the year, the labor standards of comparatively few railroad employees, particularly on the class I railroads of the United States, remained undetermined by the voluntary processes provided by the Railway Labor Act. Substantial progress in the extension of employee representation and the negotiation of labor agreements was also made on the air lines by the close of the fiscal year.

An important function of the Board under the law, when its services are properly invoked, is to aid in resolving disputes among employees as to representation and to certify the results to the carriers and the employees concerned. In the course of such handling, it sometimes becomes necessary for the Board to make rulings on the employees who are eligible to vote in a given craft or class and also to determine the wording of rules to govern representation elections. In connection with such determinations, the Board has found it necessary occasionally to hold formal hearings, prepare findings of facts, and make rulings. The Board is pleased to report that this phase of its work has decreased to a very considerable extent during the fiscal year 1939. In most instances where differences have arisen over election rules, the Board, through its mediation efforts, has been successful in effecting agreement between the parties to such disputes.

Interunion representation disputes between national organizations decreased in number during the year 1939 compared with 1938. However, this particular class of cases still accounted for over onethird of all representation cases disposed of by the Board during the year. As indicated in its annual report for 1938, the Board is still of the opinion that the purposes of the Railway Labor Act are not furthered by permitting disputes of this nature to acquire such magnitude as to require the assistance of the Board in their resolution. It is again urged that every effort be made by national organizations which become involved in representation disputes to adjust them among themselves.

The trend indicated in last year's report in the matter of change in the representation of employees continued during the fiscal year 1939. In approximately 40 percent of all crafts or classes of employees involved in representation disputes, elections resulted in no change, the challenging organizations being on the losing side. Based on the number of employees involved, approximately 70 percent favored no change in the organizations which had heretofore represented their interests. This trend was particularly evident in disputes over representation between labor organizations national in scope. Of 31 such disputes, 29 were among employees in train, engine, or yard service on the railroads. Despite the large number of such disputes, the net change in representation was small. The Board continues to feel that the amount of time expended on such cases is entirely disproportionate to the good accomplished.

3. MEDIATION PROCEEDINGS

As provided in section 5, first, of the Railway Labor Act, the most important task of the National Mediation Board is the mediation of differences between carriers and their employees in the matter of labor agreements or changes in the terms of these agreements not previously adjusted in conference. As detailed in the subsequent sections of this report, the mediation activities of the Board during the fiscal year 1939 resulted in the consummation of the largest number of agreements effected in mediation during any single year of the Board's existence.

The primary duty of carriers and their employees under the terms of the Railway Labor Act is to exert every reasonable effort to make and maintain labor agreements and to settle all disputes involving such agreements with all expedition in conference between representatives duly designated and authorized to speak for their principals. The law, therefore, places prime emphasis on direct conferences between the parties as the first and most important step leading to the accomplishment of the purposes of the act. The mediatory services of the Board are only in order and forthcoming where direct negotiations between the parties, diligently and conscientiously conducted, have exhausted all possibility of effecting agreement between them. Mediation by the Board of the matters specifically at issue thus operates to continue the negotiations already started by the parties them-From the time, however, that the Board steps into the picture, selves. the negotiations proceed under its auspices and with the help of its representatives. It may be said, therefore, that mediation by the Board under the terms of the Railway Labor Act and in keeping with the methods and practices it has developed on the whole operates to promote and extend the voluntary and democratic process of adjusting differences over labor standards by conference between and with the parties directly concerned.

4. LABOR AGREEMENTS

During the fiscal year 1939, progress continued to be made in the negotiation and signing of labor agreements between the carriers and their employees as contemplated by the Railway Labor Act. In the course of the year approximately 400 new agreements or revisions and transfer of existing agreements were added to the already large number of agreements negotiated by the carriers and their employees subject to the act. This figure is about the same as the number of such agreements, revisions, and transfers received during the previous year. Included in this number are 21 agreements applying to the airline carriers and their employees.

3

5. THREATENED STRIKES AND EMERGENCIES

Of all the situations calling for mediation handled by the Board. only two involved threats by employees to withdraw from the service. of the carriers employing them. These threats did not arise, however, until all efforts by the National Mediation Board, made in conformity with the provisions of the Railway Labor Act and in keeping with its practices and policy, had been completely exhausted. In the one situation involving virtually all of the major railroads and practically all of their employees other than those in official capacity, the President of the United States deemed it proper to intervene by issuing a proclamation and setting up an emergency or fact-finding board as he may do under section 10 of the Railway Labor Act. This emergency board carefully reviewed the facts and investigated the issues involved in the differences between the railroads and their employees leading to the threatened emergency, and rendered its report to the President, who in turn made it public. The railroads of the United States, to their great credit, accepted the recommendations of the President's board and withdrew their action for a wage reduction out of which the threatened emergency grew, whereupon the decision of the employees to strike was also withdrawn. In addition and at the special request of the President, these railroads also joined with their employees through a joint committee to work out a national plan for submission to Congress looking towards the solution of some of the more acute difficulties which have arisen in recent years affecting the domestic transportation agencies of the country.

In the case of one air carrier, the Eastern Airlines, some of the employees involved in a threat to strike in due time left the service. No emergency was proclaimed. The strike, however, was of limited duration and could have been avoided if the carrier had agreed with its employees to arbitrate certain differences over rates of pay and rules which were not adjusted in mediation.

6. LITIGATION

No legal issues involving the constitutionality of the Railway Labor Act were raised in the course of the fiscal year. Such litigation as did arise was confined either to questions growing out of the application of the act in certain technical situations or out of the administrative activities of the National Mediation Board, the resulting cases being comparatively few in number and only two of which were finally disposed of by the courts during the year.

These two cases concerned the status of electrically operated railroad lines under the Railway Labor Act. The first case was that of the Hudson & Manhattan Railroad Co., which maintained that it was not subject to the provisions of the act. After the lower courts finally upheld the findings of the Interstate Commerce Commission to the effect that this particular carrier was subject to the act, the carrier appealed to the Supreme Court of the United States, which denied certiorari with the result that the findings of the lower court became effective. The Hudson & Manhattan Railroad Co. has now recognized the applicability of the Railway Labor Act to its situation and is complying with its provisions. The second case involved the Utah & Idaho Central Railroad Co., 305 U. S. 177. Review of this case was accepted by the Supreme Court of the United States. The Court's decision settled the issue as to whether an electrically operated carrier, not part of a general system of steam transportation but operated in interstate commerce, is properly within the jurisdiction of the Railway Labor Act by sustaining the Interstate Commerce Commission findings to the effect that this carrier was subject to the act. In rendering its decision, the Supreme Court reversed previous contraviews held by the lower courts.

7. NATIONAL RAILROAD ADJUSTMENT BOARD

The National Railroad Adjustment Board consists of an equal number of representatives of the railroads and of their employees. It maintains headquarters at Chicago, Ill., and is composed of four divisions, each division being charged with hearing and deciding disputes growing out of grievances or the interpretation or application of rules incorporated in duly negotiated labor agreements. When the members of the various divisions are unable to agree upon decisions and come to a deadlock, such members may select a neutral party to sit with them to help break the deadlock. In the event, however, they are unable to agree upon such a neutral, he may be appointed by the National Mediation Board upon request of the division concerned.

The annual reports of the four divisions of the National Railroad Adjustment Board will be found as an appendix to this report.

8. LABOR RELATIONS IN THE AIR TRANSPORT INDUSTRY

The commercial air lines and their employees became subject to the Railway Labor Act by virtue of title II enacted in 1936 as an amendment to the act. Continued progress was made during the year in the negotiation and consummation of labor agreements in this important field of transportation, a total of 37 such agreements now being in effect. All but two of these agreements cover the various classes of employees other than pilots. Two agreements were negotiated during the year covering the employees of two air lines in the latter class of service, and several conferences were initiated in the course of the year looking toward the negotiation of additional agreements. In all, 21 new agreements were negotiated during the year and duly filed with the National Mediation Board. Aside from the strike of certain air-line employees already referred to, all differences which arose between the air lines and their employees were amicably adjusted, either between the principals directly concerned or with the help of the National Mediation Board. On the whole, the conclusion cannot be escaped that the relative stability prevailing in air-line labor relations is due in no small measure to the fact that the air lines and their employees are subject to the provisions of the Railway Labor Act and that most of the air-line operators and the representatives of their employees are guided by the provisions of the act in the developnent and maintenance of their labor relations.

 $\mathbf{5}$

II. RECORD OF CASES

1. CASES HANDLED BY THE BOARD

At the beginning of the fiscal year, July 1, 1938, the Board's docket contained 145 cases pending or unsettled.¹ During the year, 179 cases were docketed, making a total of 324 cases in which the services of the Board were required. In addition, approximately 50 invocations for the Board's services had not yet reached the status of formal cases, but were in the process of being docketed as such at the end of the fiscal year.

During the fiscal year, 235 cases were finally disposed of, leaving 89 cases pending and unsettled as of June 30, 1939. The 235 cases disposed of represented a decrease of 6 cases under the preceding year, during which 241 cases were closed out. The Board disposed of 56 more cases than it received during the fiscal year, and thus was able to reduce the backlog of pending cases from 145 on June 30, 1938, to 89 on June 30, 1939. However, this reduction was brought about entirely by the smaller number of cases that had been docketed, and as soon as the undocketed cases on hand on June 30, 1939, are docketed the total will increase to approximately last year's figure. It would appear that the totals of cases finally disposed of during this and the preceding year correspond quite closely to the maximum results which may be expected from the Board's present personnel, and that an appreciable increase in the number of cases docketed would result in an increasingly greater number of cases pending and unsettled.

Cases subject to the jurisdiction of the National Mediation Board are of three general classes: (1) disputes among employees as to who is their duly designated and authorized representative; (2) disputes between carriers and their employees growing out of the negotiation of new agreements or the changing of existing agreements, and (3) the interpretation of mediation agreements where controversy has arisen over the meaning or application of such agreements. Cases in the first category are designated as "representation" cases, those in the second as "mediation" cases, and those in the third category as "interpretation" cases.

Table 1 is a summary of all the cases received (1,198) and the cases disposed of by the Board (1,109) during the first 5 years of its operation under the amended Railway Labor Act.

During this period, the number of mediation cases docketed (550) exceeded the number of representation cases docketed by 12, and the number of mediation cases disposed of (558) was larger by 20 than the number of representation cases settled.

During the year the number of mediation cases disposed of was 62 larger than the number of representation cases closed out. A reduction of 53 cases was effected in the backlog of mediation cases at the close of the year, while the unsettled representation cases decreased by 3.

2. DISPOSITION OF CASES

Of the 235 cases disposed of by the Board during the year, 86 were representation cases involving disputes among employees, 148 were disputes between carriers and employees requiring mediation, and 1 was an interpretation of an agreement previously secured by mediation.

In 51 of the 86 disputes over representation among employees, elections were held and the representatives chosen were certified to the parties concerned. In 12 cases no elections were held, but the Board's representatives checked the employees' authorizations against the pay roll or other authentic records of the carriers. In 2 instances, representatives were recognized by the carriers without formal certification. Of the remaining 21 cases involving representation, 11 were withdrawn by the employees during investigation by the Board, 2 were withdrawn prior to investigation, and 8 were dismissed by the Board.

Of the eight cases dismissed, two were so disposed of because the Board's investigation revealed that no dispute over representation among the employees concerned within the meaning of the law was found to exist. Three cases were dismissed for the reason that the parties invoking the services of the Board were endeavoring to split a generally recognized craft or class. One case involved a dispute as to what constituted the craft or class and was not actively pursued by the invoking organization after the Board had ordered a hearing, being dismissed after a reasonable period had elapsed without further action on the part of the organization. The remaining two cases involved no change in representation of the class or craft covered, but rather an attempt to reclassify certain groups of employees. In these cases the Board ruled that no general change in representation was involved or desired by the employees. Accordingly they were dismissed.

Of the 148 mediation cases disposed of, 76 were settled by mediation Three cases were disposed of by agreements to submit agreements. the controversies to arbitration as provided in sections 7 and 8 of the Railway Labor Act. Two dockets (handled as one dispute) were closed on the basis of report rendered by an emergency board appointed by the President. In 33 cases, the invocations for mediation were withdrawn during mediation proceedings, and in 15 cases withdrawal was made before mediation began. The Board closed its files in 16 cases after refusal of its request that the controversies be arbitrated. In 8 of these cases, arbitration was refused by the carriers, in 1 by the employees, and in 7 cases the arbitration request was refused by both Three cases were dismissed by the Board. One of these was parties. dismissed as the result of a court ruling on the subject of the proper individual to be recognized as the executive head of the invoking organization, the request for the Board's services having been made by the individual adversely affected by such decision. The other two cases were closed by Board action, as the causes for requesting the Board's services had subsequently been removed.

Table 2 is a summary by fiscal years of all cases disposed of by the Board since its inception in 1934. Compared with the fiscal year 1938, the representation cases handled to a conclusion during the fiscal year. 1939 decreased from 138 to 86. This decrease is in almost direct ratio to the decrease in representation cases on hand and received during the fiscal years 1938 and 1939, which was from 165 to 110, as shown in table 1.

The total number of mediation cases disposed of increased from 101 in the previous year to 148 in the fiscal year ended June 30, 1939, being the second largest total number disposed of in 1 year since the Board was created in 1934. The number of mediation agreements signed, 76, was the largest in the Board's experience, being an increase of 13 over the fiscal year 1938. The percentage of cases disposed of by signed mediation agreements during the fiscal year 1939 was 51. The percentage of cases settled in the year 1939 through the Board's efforts, including signed mediation agreements, signed arbitration agreements, and cases withdrawn during mediation, was 75 percent of the total number disposed of. In the fiscal year 1939 the refusals to arbitrate showed a slight increase over the year 1938, but were less than in 1937 and 1936. From the standpoint of the effective mediation work of the Board, the record of the year shows continued progress over the preceding years.

Table 2 shows that 1,101 cases have been disposed of by the Board since its inception in 1934, of which 538 were representation cases, 558 were mediation cases, and 5 interpretation cases. Of the 538 representation cases, 441, or 82 percent, resulted in the issuance of certifications by the Board determining the right of representation by one or

more labor organizations. Of the 558 mediation cases handled during the 5-year period, 261, or 47 percent, resulted in mediation agreements, while 127, or 23 percent, were withdrawn as a result of mediation. During the 5-year period, 23 representation cases were disposed of

by the carriers extending recognition to the labor organizations without formal certification by the Board. This brings the total number of representation cases resulting in the definite establishment of the right of representation to 464, or 86 percent of all representation cases disposed of by the Board.

3. CARRIERS INVOLVED IN DISPUTES

Table 3 reflects the extent to which the Board's services were used on the various classes of carriers subject to the Railway Labor Act. 'To represent the situation as accurately as possible, the cases involving more than one carrier have been excluded from this tabulation. The excluded cases include two mediation cases, each involving practically all class 1 carriers, which arose in connection with the carriers' proposal for a national wage decrease.

The largest portion of the Board's work naturally involved class 1 carriers by rail, which employ approximately 95 percent of all railroad employees. Of the total of 140 class 1 rail carriers, 87, or 62 percent, were served by the Board in cases involving only 1 carrier. The next most important category was switching and terminal companies, 20 in this classification being separately involved in cases handled by the Board. During the year the Board handled 4 cases on different air carriers.

			Different carriers involved in-

4. MAJOR GROUPS OF EMPLOYEES INVOLVED IN CASES

Table 4 shows the total number of cases disposed of during the year, separated by types, and subdivided among the major groups of employees involved.

Practically every craft or class of employees was involved in one or more of the 235 cases handled. Engine, train, and yard service employees figured most heavily in both representation and mediation cases, while the number of representation cases involving maintenance of equipment employees was also large. These two groups combined accounted for 66 percent of all of the representation disputes.

III. REPRESENTATION DISPUTES-ELECTIONS

1. ELECTIONS AND CERTIFICATION OF REPRESENTATIVES

During the year, the Board received and docketed 83 representation cases, which, added to the 27 cases remaining on the docket at the end of the 1938 fiscal year, made a total of 110 such cases requiring investigation. Of this number, 86 cases were disposed of during the fiscal year ended June 30, 1939, leaving 24 representation cases pending and unsettled at the end of the year.

The number of new cases received and docketed, 83, showed a decrease of 29 as compared with the corresponding figure for the preceding year, 112. Cases disposed of during the year likewise decreased from 138 in 1938 to 86 in 1939.

As reflected by the experience of preceding years, during the fiscal year 1939 there were many more than 86 specific disputes among the employees concerned in the number of cases disposed of. The Railway Labor Act requires the Board to determine the choice of representation among the employees separately for each class or craft involved in a representation dispute. In many of the cases handled, particularly those involving maintenance of equipment employees, several different crafts or classes were in disagreement on the matter The total number of crafts or classes so concerned of representation. This is a decrease of 82 under the in the 86 cases disposed of was 152. total of 244 crafts or classes involved in the 138 cases disposed of during the preceding year, and this decrease is in almost exact ratio to the decrease in the total number of cases handled. Against the decreases in the number of representation cases and crafts or classes involved compared with the previous year, the total number of employees among whom these disputes had arisen increased from 52,167 in the fiscal year 1938 to 65,909 in the year ended June 30, 1939. This number of employees was the largest since the year 1934.

In respect to the 152 crafts or classes involved in the 86 representation cases disposed of, 94 certifications were issued establishing representation after secret elections had been held, and 15 certifications were issued on the basis of checks of the employees' signed authorizations against the pay-roll records of the carriers. Elections in two crafts or classes resulted in no majority for any representative, and accordingly no certification was issued in these instances. In two additional representation cases the carriers concerned recognized the representatives for one craft or class in each case without formal certification. In all, representation was determined for a total of 111 crafts or classes of employees through the services of the Board in accordance with the provisions of the Railway Labor Act.

Eleven representation disputes involving 21 crafts or classes were withdrawn during investigation by the Board, and 2 cases involving 8 crafts were withdrawn prior to the start of investigation. Eight disputes involving 12 crafts or classes were dismissed by the Board after investigation, since it was found that in these cases no disputes over representation within the meaning of the law existed.

During the year over 88 percent of the employees eligible to participate in the secret elections cast ballots. The same percentage is reflected in the totals for the 5-year period. These results indicate quite clearly the importance attached by wage earners to the right to select representatives for collective bargaining through the means of a secret ballot.

Table 5 shows, for the five fiscal years 1934-39, the number of cases, the number of crafts or classes, and the number of employees involved in all representation disputes disposed of by the Board, subdivided as to the method of their disposition.

2. MAJOR GROUPS OF EMPLOYEES INVOLVED IN REPRESENTATION DISPUTES

Over half, or approximately 56 percent, of the total of crafts or classes involved in representation disputes fell within the maintenance of equipment group of employees. Also, during the fiscal year 1939, over 84 percent of the total number of employees involved in representation disputes came in this category. Twenty-eight cases were handled in this group.

The largest number of cases handled for any one of the major groups shown was 29, for the group comprising employees in engine, train, and yard service. This number of cases included disputes among the employees in 36 crafts, but the number of employees involved was only 5,266, or about 8 percent of the total number of employees involved in all cases. The next largest numbers of employees involved in representation disputes occurred among the clerical, office, station, and storehouse employee and the dining car employee groups. Disputes in the maintenance of way and signal department groups were negligible. One representation case was handled among air-line employees, and three among the personnel in railway-marine service.

As has been the case in preceding years, the largest number of employees involved in representation disputes continues to be among those groups in which the trend toward representation by the national organizations is still in progress. On the other hand, representation disputes among the various organizations in train and yard service accounted for the largest number of cases handled in any one group, although there has been a decided drop in the number of cases handled in these classes since last year.

Table 6 shows the number of crafts or classes and the number of employees involved in all representation disputes, by major groups of employees.

3. TYPES OF REPRESENTATION DISPUTES

Representation cases handled by the Board fall generally within two major groups; first, those involving disputes between national organizations or local unions and so-called system associations or unorganized employees, and second, interorganization disputes involving two national organizations, a national organization and a local union, or two local unions.

Approximately 88 percent of the employees involved in all representation disputes were included in cases coming within the first group; in this group, 97 percent of the total number of employees were involved in 30 cases covering disputes between national organizations and system associations. This figure is abnormally high by reason of one large dispute among maintenance of equipment employees in which the total number involved was over 56 percent of the total in this one classification. Seventeen other cases, involving only 2 percent of the total number of employees in this major group, were disputes between national organizations and unorganized employees.

The total number of interorganization disputes between national organizations, and the number of employees involved therein, decreased slightly during the fiscal year 1939. Disputes between national organizations and local unions decreased sharply both in number of cases and employees involved during 1939 as compared with the fiscal year 1938. Local unions continued to play a decreasingly important part in the total number of disputes handled by the Board.

Table 7 shows the distribution of representation cases handled, according to the types of organizations, with the number of crafts or classes and employees involved, for the fiscal years 1934-39.

4. CERTIFICATIONS ISSUED

Table 8 indicates the extent to which the various types of labor organizations secured representation through cases handled by the Board. Elections were held in 94 of the total of 152 crafts or classes involved in all representation cases. In addition, certifications were made for 15 crafts or classes as a result of checks made of the emplovees' authorizations.

Approximately two-thirds of the total number of crafts or classes involved, and over 89 percent of the total number of employees, are found in disputes between national organizations and system associations, the great majority of these falling under the maintenance of equipment employee group. Of the 47,438 employees who cast valid votes in all elections (including proved authorizations), 42,890 were involved in disputes of this type.

As in the past years, national organizations were the principal gainers in the number of crafts or classes certified. Although they received only about 48 percent of the total votes (including proved authorizations), they were certified in 73, or approximately 70 percent of the total of 109 crafts or classes for which certifications were issued.

No certifications were issued to any individual as representing employees during the fiscal year 1939.

TABLE 8.—Number of crafts or classes certified and votes ¹ cast for various types of labor organizations in representation cases,² by types of disputes, 1938-39

¹ Or proved authorizations.

¹ Includes only cases in which elections or checks of authorizations were held. See table 6 for distribution of all representation cases.

Table 9 shows the results of cases disposed of by the Board in which efforts were made by the invoking organizations to change representation. One hundred and eleven crafts or classes were involved in elections and checks of authorizations, certifications being issued to 109 crafts or classes, and in the remaining 2, which are included under the heading "representation unchanged—elections," no majority was received by any candidate; hence no certification was issued.

Representation was acquired for the first time by 21 crafts or classes, changed in the case of 49, and remained unchanged in 41 instances. However, of the total number of employees involved, representation was acquired in but 4 percent, changed in 23 percent, and remained unchanged in 75 percent.

5. EXTENT AND NATURE OF LABOR REPRESENTATION

One of the principal features of the Railway Labor Act is the provision of machinery for the orderly designation of representatives of employees so that collective agreements may be duly negotiated with the carriers subject to the act, establishing the labor standards of these employees. The trend evident during the past years toward more complete representation by labor organizations of the employees of the principal carriers, which has been frequently commented upon by the Board in its previous reports, has been continued during the past year.

Table 10 shows by organizations and crafts or classes, the number and mileage of the principal carriers by rail whose employees were represented by those organizations as of June 30, 1939. In the reports for previous years, this table has reflected the situation among class I railroads only, but the table below includes a few class II carriers which have recently lost their class I status, for the purpose of continuing the basis of comparison with former years. Columns have been included in the table showing the percentage of total mileage of the carriers included on which the employees in the various crafts or classes were represented by labor organizations during the fiscal years 1938, 1937, and 1936.

National organizations continued to increase the proportions of the total mileage on which they represent employees. At the same time, there has been a further decrease in the portions of the mileage on which the employees are represented by system associations. In general, the losses of the system associations during the past year have been proportionate to the gains made by the national organizations. The loss of representation by local unions to the national organizations also continued during the fiscal year 1939.

In the annual reports of the Board for the years 1937 and 1938, there were included in this table organizations representing the marine department and miscellaneous related groups of employees of the rail carriers. However, since the mileage of a railroad has no particular relation to the employees in these classes of service, no mileage figures were shown opposite the names of the organizations carried in those reports. For this reason, it has been thought proper to separate such employees from those in strictly rail service, and a separate table, No. 10 (a), is carried below, which shows the various organizations and crafts representing such employees and the number of railroads on which the organizations named represent such employees. In this category of employment it is also evident that the national organizations are to a large extent replacing the system associations

IV. DISPUTES MEDIATED—SETTLEMENTS

On June 30, 1938, there were 117 mediation cases on hand. During the fiscal year 1939, there were 95 new cases docketed, making a total of 212 cases requiring the mediatory services of the Board. During the year, the Board disposed of 148 mediation cases, leaving 64 cases pending and unsettled as of June 30, 1939. Of this total, 2 were on air lines, and 62 were on carriers by rail.

Compared with the previous year, new mediation cases docketed decreased from 125 to 95, while the cases disposed of increased from 101 to 148.

1. MEDIATION AND ARBITRATION AGREEMENTS SIGNED

Seventy-six of the 148 mediation cases handled to a conclusion by the Board in the course of the fiscal year, or 51 percent, were disposed of by agreements between the parties concerned. During the preceding year, 63 cases were settled by such agreements. Since its establishment in 1934, the National Mediation Board has settled 261 cases by mediation agreements. During the fiscal year 1939, 3 additional cases were disposed of by agreements to arbitrate the matters in dispute, making a total of 79 cases disposed of through the Board's efforts either in the form of agreements effected in mediation or agreements to arbitrate. Including 33 cases withdrawn during the process of mediation, and 16 cases closed through refusal of the parties to arbitrate, a grand total of 128 cases were disposed of in which the Board put forth its efforts to bring about agreements.

The following table shows the mediation cases disposed of by signed agreements between the parties with the help of the Board during each of the five fiscal years 1935–39, divided among the principal categories of subjects covered.

Issues involved	5 year		1	Fiscal yea	r	
	Total	1939	1938	1937	1936	1935
Total—all cases	1 268	76	63	62	1 43	24

TABLE 11.—Issues involved in cases disposed of by mediation agreements, fiscal years 1935-39

¹ Includes 6 cases disposed of by agreements negotiated directly by the parties after mediation, but not signed as mediation agreements, and 1 case disposed of by an arbitration agreement.

2. AIR LINE MEDIATION CASES

As mentioned in last year's report, three settlements in mediation were effected on air-line carriers during the fiscal year 1937-38, these being the first cases of this kind handled after the air lines and their employees were made subject to the Railway Labor Act in 1936. During the fiscal year 1939, four additional mediation cases involving air-line carriers and their employees were handled by the Board. Two of these involved the craft or class of air-line mechanics, and the other two the craft or class of air-line pilots.

3. OTHER ADJUSTMENTS OF MEDIATION CASES

Of the 148 cases disposed of during the year, 69 were closed out through means other than mediation agreements and agreements to arbitrate. Two cases were disposed of through handling given by an emergency board; 33 cases were withdrawn during the process of mediation; 15 were withdrawn before mediation began; 16 cases were closed out through refusal of the parties to arbitrate the questions in dispute; and 3 were dismissed by the Board.

V. ARBITRATION AND EMERGENCY BOARDS

1. ARBITRATION BOARDS

Three agreements to arbitrate disputes in accordance with sections 7 and 8 of the Railway Labor Act were signed during the fiscal year 1939, and awards were made by arbitration boards in two of them prior to the close of the year.

The first case handled during the year was a dispute between the following parties:

> Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen & Enginemen, Order of Railway Conductors, Brotherhood of Kailroad Trainmen, and the Atlantic Coast Line Railroad Company

Members of the arbitration board were: Dozier A. DeVane, attorney, Orlando, Fla., chairman; O. H. Page, general superintendent, Atlantic Coast Line Railroad, Savannah, Ga.; G. W. Laughlin, first assistant grand chief engineer, Brotherhood of Locomotive Engineers, Cleveland, Ohio.

The two arbitrators selected by the parties being unable to agree upon a third member of the arbitration board, this member was appointed by the National Mediation Board. The subject of the dispute was a request by the employees for free transportation by the carrier for train and engine service employees between the passenger station and the shops at one point on the line of the carrier.

Arbitration hearings commenced on December 5, 1938, and were concluded on December 7, 1938. The award of the arbitration board was issued on December 8, 1938, granting the employees' request. The second arbitration case involved a dispute between the

Brotherhood of Railroad Trainmen and the

Sacramento Northern Railway

Members of the arbitration board were: George W. Stocking, professor of economics, University of Texas, Austin, Tex., chairman; E. W. Mason, vice president and general manager, Western Pacific Railway; C. W. Stevens, general chairman, Brotherhood of Railroad Trainmen.

The arbitrators selected by the parties in this case agreed upon the third member of the board. Arbitration hearings began on February 27, 1939, and were concluded February 28, 1939. The arbitration board issued its award on March 2, 1939.

The subject of the dispute was the application of an increase in rates of pay. The award granted the increase requested but did not make the effective date retroactive.

2. EMERGENCY BOARDS

One emergency board was appointed by proclamation of the President during the fiscal year 1939 as provided for by section 10 of the Railway Labor Act. The parties involved were a Joint Conference Committee, representing most of the principal carriers by rail in the United States, and a committee representing 18 cooperating organizations, the Brotherhood of Railroad Trainmen being an individual party in addition to the other 18. The Committee of Eighteen Cooperating Organizations represented the following national organizations:

Brotherhood of Locomotive Engineers Brotherhood of Locomotive Firemen & Enginemen Order of Railway Conductors of America Switchmen's Union of North America The Order of Railroad Telegraphers International Brotherhood of Boilermakers, Iron Ship Builders & Helpers of America **International Association of Machinists** International Brotherhood of Blacksmiths, Drop Forgers and Helpers Sheet Metal Workers' International Association International Brotherhood of Electrical Workers Brotherhood of Railway Carmen of America International Brotherhood of Firemen & Oilers, Helpers, Roundhouse & Railway Shop Laborers Brotherhood of Railway & Steamship Clerks, Freight Handlers, Express & Station Employees Brotherhood of Maintenance of Way Employees Brotherhood of Railroad Signalmen of America National Organization of Masters, Mates & Pilots of America National Marine Engineers' Beneficial Association International Longshoremen's Association.

The subject of the dispute was a proposal made by the carriers represented by the Carriers' Joint Conference Committee to place in effect a horizontal wage reduction of 15 percent for all railroad employees as of October 1, 1938.

Members of the emergency board created by the President's proclamation dated September 27, 1938, were: Hon. Walter P. Stacy, chief justice of the Supreme Court of North Carolina, Raleigh, N. C., chairman; James M. Landis, dean, Harvard Law School, Cambridge, Mass.; Harry A. Millis, professor emeritus of economics, University of Chicago.

The Board convened in the office building of the House of Representatives, Washington, D. C., on September 30, 1938, and a report to the President was rendered on October 29, 1938.

VI. WAGE AND RULE AGREEMENTS

One of the major purposes of the Railway Labor Act is to stabilize labor relations on the rail carriers and commercial air lines through the consummation of agreements covering rates of pay, rules, and working conditions between such carriers and the duly authorized representatives of their employees. The negotiation of these agreements, therefore, is an important task of the carriers and those labor organizations whose right to represent given crafts or classes of employees is established and accepted. Accordingly, the number of such agreements consummated by the carriers and their employees provides an index of the extent to which this purpose of the act is being realized.

The first annual report issued by the Board showed that 3,021 agreements between carriers and employees covering rates of pay, rules, and working conditions had been filed in accordance with section 5, third (e), of the Railway Labor Act. At the end of the following year, the number of agreements was 3,485, and for the fiscal year 1937 the number of agreements on file was 4,039, and as of June 30, 1939, the number of agreements filed with the Board was 4,061.

1. AGREEMENTS COVERING RATES OF PAY, RULES, AND WORKING CONDITIONS

Table 12 shows, for the 5 fiscal years 1934–39, the number of agreements in effect on various classes of carriers according to the types of labor organizations negotiating the agreements. In addition to the formal agreements, the Board also has on file a large number of documents relating to agreements, hundreds of which are filed by the carriers each year in the form of supplements or amendments to the working agreements already on file. These documents deal in the main with changes in scope, revisions of rules, adjustments in rates of pay, and the like.

The trends in representation reflected in the reports for past years were continued in the fiscal year 1939. National organizations again increased the number of agreements they hold on all classifications of carriers, particularly on class I and class II lines, and the switching and terminal companies, as well as on the electric railways. Representation by the organizations national in scope also increased considerably on the air carriers.

Of the total of 4,061 agreements of which the Board has record on rail carriers, organizations national in scope hold 3,556, or 87 percent. Local unions hold a total of 54 agreements, or somewhat over 1 percent, while system associations hold 451 agreements, or about 12 percent.

¹ An agreement is defined as the written terms of employment concerning rates of pay, rules, and working conditions, negotiated by the representatives of a carrier and of a craft or class of employees. The agreement may be embodied in more than one schedule or document or may be a part of a schedule or document. ² Includes local committees and individuals.

³ Revised.

⁴ Includes demurrage bureaus, refrigerator transit companies, etc.

⁵ Not included in total for all carriers. (Air-line carriers.)

2. CLASSES OF EMPLOYEES COVERED BY AGREEMENTS

The extent to which the various crafts or classes of employees on certain carriers are covered by agreements is shown in table 13. This table is a recapitulation of the data presented in detail in table 14. The method used in arriving at the total of 148 carriers considered in table 13 is explained in connection with table 14.

It will be observed that the total number of carriers in both tables 13 and 14 is less than appeared in the corresponding tables in the fourth annual report. This is due to one carrier having ceased operations during the fiscal year, four subsidiary lines having been dropped because of merger with the parent company and one carrier being eliminated account of having been erroneously shown in last year's report.

3. AGREEMENTS ON PRINCIPAL CARRIERS

A summary of the agreements between the principal carriers and the organizations representing their employees is presented in table 14. All class I carriers by rail appear on the list, together with several of their subsidiaries, or leased roads, which are included for the purpose

⁷ Includes 1 agreement on carrier having another agreement for a part of the same craft or class with a system association.

system association. ⁸ Includes 7 agreements on carriers having another agreement for a part of the same craft or class with a national organization. ⁹ Not evaluable

⁹ Not available.

of showing the extent to which joint or system agreements are in effect. Also included for purposes of comparison are four class II carriers by railroad which were formerly in class I.

The Pullman Co. and the express companies appear in the second section of the table, and air-line carriers in the third.

Opposite the name of each carrier are shown initials representing the names of the organizations holding the agreement for each craft or class of employees in the service of that carrier. National organizations are shown by the initials of the names of the respective organizations, local unions appear as LU, and system associations as SA. This table lists all the current agreements on file with the Board for the carriers shown with effective dates not later than June 30, 1939.

Section (c), showing the status on air-line carriers, appears in this table for the second time.

187209-39-3

VII. INTERPRETATION AND APPLICATION OF AGREEMENTS

Agreements made under the provisons of the Railway Labor Act fall into two main categories: first, agreements arrived at through direct negotiations between the carriers and their employees establishing rates of pay, rules, and working conditions; and, second, agreements made on similar or related subjects arrived at with the assistance of the National Mediation Board, these being referred to elsewhere in this report as mediation agreements. From time to time disputes arise between the parties to both kinds of agreements concerning their meaning and application. Machinery is set up in the Railway Labor Act for the disposition of such disputes when they arise.

1. INTERPRETATION OF MEDIATION AGREEMENTS

Section 5, second, of the Railway Labor Act, which is quoted below, provides that the National Mediation Board shall, when requested to do so, render interpretations under certain limited conditions of agreements arrived at through mediation.

Second. In any case in which a controversy arises over the meaning or the application of any agreement reached through mediation under the provisions of this act, either party to the said agreement, or both, may apply to the Mediation Board for an interpretation of the meaning or application of such agreement. The Board shall upon receipt of such request notify the parties to the controversy, and after a hearing of both sides give its interpretation within 30 days.

Under this section of the law, the Board when called upon may only consider and render an interpretation on the specific terms of an agreement actually signed in mediation, and not for matters incident or corollary thereto.

In keeping with these specifically limited conditions, the National Mediation Board was called upon during the fiscal year 1939 to interpret one mediation agreement.

2. INTERPRETATION OF WAGES AND RULES AGREEMENTS

The National Railroad Adjustment Board was established under section 3 of the Railway Labor Act for the purpose of considering and deciding disputes arising between carriers and their employees growing out of the meaning and application of the provisions of agreements governing rates of pay, rules, and working conditions. The discharge of this function by the four divisions of the Adjustment Board is described by it in detail in the appendix supplied by it for this report. Table 15 is a tabulation of the cases handled by each division for the fiscal years 1938 and 1939.

The nature of the disputes considered and disposed of by the Adjustment Board is indicated in the detailed tables in the reports of the various divisions.

Eight men were appointed by the National Mediation Board during the fiscal year 1939 to serve as referees for the various divisions of the National Railroad Adjustment Board in cases that were deadlocked.

Three other men, who had previously served by National Mediation Board appointment, were selected by divisions of the Adjustment Board during the year to decide additional cases. All but three of the referees appointed during the fiscal year 1939 by the Mediation Board had also served previously in that capacity and were listed in previous reports. The new appointees during 1939 were: Dexter M. Keezer, president, Reed College, Portland, Oreg.; Hammond E. Chaffetz, attorney, Washington, D. C.; Dozier A. DeVane, attorney, Orlando, Fla.

TABLE 15.—Cases docketed and disposed of by the National Railroad Adjustment Board, fiscal years 1939 and 1938

VIII. ORGANIZATION AND FINANCES OF THE NATIONAL MEDIATION BOARD

1. ORGANIZATION

The National Mediation Board consists of three members, appointed by the President with the advice and consent of the Senate. The terms of office of the members of the Board (except in case of a vacancy or unexpired term) are for 3 years, one Board member being appointed each year. The Board annually designates one of its members to act as chairman.

The Board also appoints a secretary who, in addition to his secretarial duties to the Board, handles its routine administrative activities. The field work of the Board, consisting chiefly of the mediation of labor questions and disputes over the terms of railway and airline labor agreements and the investigation of disputes among railway and airline employees over representation, is handled by a field force consisting of nine mediators as well as by the members of the Board. Important mediation cases are also handled by the Board as a whole. In addition, the members of the Board, either together or singly, conduct the necessary hearings in connection with disputes among employees over representation as well as in connection with the interpretation of mediation agreements. The members of the Board are assisted in their work by three secretaries and office assistants.

2. FINANCIAL STATEMENT

The unexpended balance of \$3,146 at the end of the fiscal year in the operating account of the National Mediation Board is subject to outstanding bills incurred prior to July 1, 1939, but not paid as of that date.

The unexpended balances for both arbitration boards and emergency boards have been reappropriated from year to year. For the fiscal year 1939, the unexpended 1938 balances of \$55,078 for arbitration boards and \$37,351 for emergency boards were reappropriated and made available for the fiscal year 1939.

Annual expenditures for arbitration and emergency boards cannot be definitely estimated in advance, due to the fluctuation in the need for the services of such boards from year to year. Also, the expenses incurred by such boards vary greatly depending upon the nature and extent of the questions to be arbitrated, and of the emergencies that arise from time to time. Since the needs for such services cannot be anticipated accurately, it is necessary to have sufficient funds available to meet such contingencies. Financial statement, fiscal year 1938-39

STATEMENT

On June 21, 1934, by the passage of Public, No. 442, Seventy-third Congress, there was created the National Railroad Adjustment Board.

CLASSES OF DISPUTES TO BE HANDLED

The disputes between an employee or group of employees and a carrier or carriers growing out of grievances or out of the interpretation or application of agreements concerning rates of pay, rules, or working conditions, including cases pending and unadjusted on the date of approval of this act, shall be handled in the usual manner up to and including the chief operating officer of the carrier designated to handle such disputes; but, failing to reach an adjustment in this manner, the disputes may be referred by petition of the parties or by either party to the appropriate divisions of the Adjustment Board with a full statement of the facts and all supporting data bearing upon the disputes.

Accounting of all moneys appropriated by Congress for the fiscal year 1939, pursuant to the authority conferred by an act to amend the Railway Labor Act, approved May 20, 1926 [Approved June 21, 1934]

Regul	ar	appropriations:	

Salaries and expenses,	National Railroad	$\mathbf{Adjustment}$	Board,	
National Mediation	Board			\$191, 200. 00
Printing and binding				40, 000. 00

Deficiency appropriations:

Second Deficiency Appropriation Act, fiscal year 1939. (This act authorized the transfer of not to exceed \$10,000 from the appropriation for printing and binding to salaries and expenses, and increased the amount available for services of referees from \$35,000 to not to exceed \$50,000.)

1 Resigned.

JURISDICTION-FIRST DIVISION

The First Division took over the work of the four regional train service boards, adding thereto the representation of many carriers not parties to any of the regional boards, and also the Switchmen's Union of North America as parties to the division.

The First Division has jurisdiction over disputes involving train and yard-service employees of carriers; that is, engineers, firemen, hostlers, and outside hostler helpers, conductors, trainmen and yard-service employees.

JURISDICTION-THIRD DIVISION

Third Division: To have jurisdiction over disputes involving station, tower and telegraph employees, train dispatchers, maintenance of way men, clerical employees, freight handlers, express, station and store employees, signal men, sleeping car conductors, sleeping car porters, and maids, and dining car employees. This division shall consist of ten members, five of whom shall be selected by the carriers and five by the national labor organizations of employees. (Pars. (h) and (c), sec. 3, first, Railway Labor Act, 1934.)
