¹Appointed as Board member March 5, 1948.

LETTER OF TRANSMITTAL

NATIONAL MEDIATION BOARD, OFFICE OF THE CHAIRMAN,

Washington, D. C., November 1, 1948.

To the Senate and House of Representatives of the United States of America in Congress assembled:

Pursuant to the provisions of section 4, second, of Public, No. 442, approved June 21, 1934, I have the honor to submit the Fourteenth Annual Report of the National Mediation Board for the fiscal year ended June 30, 1948, together with the annual report of the National Railroad Adjustment Board, as required by section 3, first (v), of the same act.

FRANK P. DOUGLASS, Chairman.

FOURTEENTH ANNUAL REPORT

OF THE

NATIONAL MEDIATION BOARD

I. SUMMARY AND CONCLUSIONS

1. GENERAL

The fiscal year ended June 30, 1948, marks the fourteenth year of the National Mediation Board and the twenty-second year of the Railway Labor Act. The National Mediation Board was created in 1934 by amendments to the original act of 1926. Jurisdiction of the Board, originally confined to common carrier railroads, the express and pullman companies, was extended to common carriers by air, by amendments approved April 10, 1936.

The era of unsettled labor conditions which has plagued industry generally during the postwar adjustment period has not spared the railroads and airlines. Employees caught in the bind of higher living costs have endeavored to preserve their purchasing power by seeking wage increases. Both rail and airline carriers are regulated industries to the extent that the government fixes rates from which their revenue is derived and consequently the determined employer resistance to employee demands has resulted in some of the most bitterly contested disputes in the history of the Railway Labor Act. Although threatened strikes have been almost a daily problem among railroad and air-line employees, there have been relatively few instances where procedures of the law were ineffective in settling the disputes and avoiding work stoppages.

This statement should not be interpreted to minimize the seriousness of the few instances where the law failed to prevent interruptions to service. Thus, in the Nation-wide dispute over wages and rules involving railroad engine service employees and yardmen, all of the steps prescribed by the law were exhausted without a settlement being made. After declining to accept recommendations for settlement made by a presidential emergency board the organizations set a strike date for 6 a. m., May 11, 1948. To forestall this action extraordinary measures were invoked to prevent a Nation-wide tie-up in rail transporation. The President issued an Executive order ¹ whereby operation of the railroads was taken over by the Secretary of the Army. In taking this action the President called upon every railroad worker to cooperate with the Government by remaining on duty and stated:

It is essential to the public health and to the public welfare generally that every possible step be taken by the government to assure to the fullest possible extent continuous and uninterrupted transportation service. A strike on our railroads would be a Nation-wide tragedy, with world-wide repercussions.

¹ Executive Order 9957 of May 10, 1948.

Notwithstanding the above action the threatened strike order was not canceled whereupon the office of the Attorney General applied to the United States District Court for the District of Columbia for a restraining order. A temporary order was granted on May 10 and, as a result, the threatened strike was called off. Following hearings a preliminary injunction was issued by the court on June 11 and a permanent injunction was issued on July 2, 1948. Although the above procedures were effective in preventing the strike they did not settle the dispute and, as so often happens, it remained for this to be accomplished eventually through mediation. In this instance the mediation was conducted under White House auspices, but in many cases where procedures of the law are used initially without success, mediation has been resumed by the Mediation Board or by emergency boards in bringing the parties to agreement.

In other disputes involving railroad or air-line employees during 1948 where strikes were called the public welfare was not so vitally affected as in the national railroad case.

A strike of 18 days by pilots of American Overseas Airlines resulted from an unsettled dispute over hours of service and a grievance issue. Initial mediation was unsuccessful and the parties were not agreeable to submitting their dispute to arbitration. Following these efforts the strike began at 6 a. m., September 30, 1947, and flight operations of the carrier were suspended for 18 days. Through efforts of the Board a truce was effected whereby operations were reinstated simultaneously with the resumption of mediation. Where the parties were unwilling to settle their dispute in mediation before the strike, they agreed promptly on terms of settlement when mediation was resumed on October 18, 1947.

Another air-line strike involved employees of National Airlines. It began on January 23, 1948, and had not been settled at the time this report went to press. Both prior to and during the stoppage the Board personally and through its mediators endeavored to work out a peaceful settlement of the disputed issues. Involved in the walk-out were pilots represented by the Air Line Pilots Association and mechanics and clerical employees represented by the International Association of Machinists. A Presidential emergency board which investigated the dispute recommended a basis for settlement and among other things said the following:

The Railway Labor Act imposes upon the carrier the duty to exert every reasonable effort to make and maintain agreements concerning rates of pay, rules, and working conditions. This duty is imposed to protect the public from the consequences of interruptions to commerce. By its unilateral actions concerning matters properly the subject of collective bargaining, National Airlines violated the duty imposed upon it by statute. National's persistent and repeated violations of the duties imposed upon it by Congress in the public interest were the major factors in the development of the existing dispute.

Notable among the strikes during 1948 involving railroad employees was a brief work stoppage of the Southern Pacific Co. caused by engineers represented by the Brotherhood of Locomotive Engineers withdrawing from the service on July 21, 1947. The dispute concerned grievances which, under the act, are subject to settlement by the First Division of the National Railroad Adjustment Board. However, in view of the threatened strike the members of the National Mediation Board endeavored to compose the dispute through mediation. Failing this the President was informed of the threatened interruption to interstate commerce, and he, in turn issued an Executive order creating an emergency board. Under section 10 of the act such boards are provided 30 days to investigate the dispute and report back to the President. During this period and for 30 days thereafter "no change, except by agreement, shall be made by the parties to the controversy in the conditions out of which the dispute arose." These provisions have been interpreted uniformly to forestall strike action for a total of 60 days where emergency boards are created under section 10. Openly disregarding these provisions, however, the brotherhood withdrew its men from service for about 6 hours during the night of July 21, 1947. Conferences between the carrier and brotherhood resulted in agreement under which the employees returned to work and further strike action was postponed indefinitely.

Another important railway strike involved some 500 employees of the Chicago, North Shore & Milwaukee Railway Co. over failure of the company to grant to employees a wage increase of 15½ cents per hour as recommended by an emergency board on September 2, 1947. The strike began on March 27, 1948, and continued until June 25. During the period some 1,400 employees of the company were thrown out of work and 72,000 patrons were denied their usual transportation service. Settlement was finally effected after persistent efforts by the Board's mediators under conditions which were far from favorable.

Other minor stoppages in railroad transportation during the year involved employees of the Bingham & Garfield Railroad and the Akron & Barberton Belt Railway. Also to be noted among strikes of employees covered by the Railway Labor Act was one by vehicle employees of the Railway Express Agency in New York City represented by the International Brotherhood of Teamsters. The strike was called by local union officers in disregard of the provisions of the law. Eventually, however, these same officers recommended and succeeded in obtaining a resumption in service. Thereafter an agreement was reached in accordance with the provisions of the act.

To place this strike record in proper perspective it should be pointed out that it is matched by 172 peaceful settlements effected through mediation or arbitration. The peaceful settlements do not, however, make up for the instances in which stoppages occurred. It is not a good record and it does not bode well for the future effectiveness of the Railway Labor Act.

2. MEDIATION PROCEEDINGS

For many years the act has been heralded as a model statute for preventing strikes. This view is based upon the effectiveness of the act in past years in facilitating peaceful settlements and the fact that the procedures as enacted were agreed upon by railroad management and unions representing railroad employees. In providing for settlement of disputes over changes in rates of pay, rules, and working conditions the act stresses the obligation on both parties to endeavor diligently to settle such matters across the conference table in direct negotiations. Failing to effect a settlement in this manner the law provides for mediation service at the request of either party to the dispute. Mediation serves to continue negotiations between the parties with the Government assisting toward amicable settlement of the dispute. If no settlement can be made in mediation section 7 of the act requires that the Board use its best efforts to induce the parties to submit their dispute to arbitration. Acceptance of arbitration is not compulsory under the law.

However, when arbitration is agreed to by the parties, the award of the Arbitration Board is final and binding. When settlements cannot be effected through mediation, arbitration is often found to be a satisfactory method of disposition of a troublesome dispute. If all of these procedures have been exhausted and the dispute still persists, the law provides, in cases where in its judgment interruption to interstate commerce is substantially threatened, that this Board shall so report to the President, who may then, in his discretion, create an emergency board under section 10 of the act, to investigate the dispute and report its findings to the President. The time limitations for proceedings under section 10 have been described in the preceding section of this chapter.

Review of these procedures shows that the so-called cooling-off principle is abundantly provided for in the law. The provisions for direct negotiations and mediation serve to extend the cooling-off period far beyond the 60 days provided by section 10. These procedures assume that if the facts of a dispute are thoroughly considered and made public the pressure of public opinion will form in favor of a fair and square settlement of the dispute.

Nowhere in these procedures is there any compulsion on either party to settle the dispute. On the contrary the law is based upon the principle of free and untrammeled collective bargaining. There is nothing in the law which abridges the right of employees to strike. In exchange for preserving the right to strike employees are subjected to delaying procedures during which the nature of the dispute can be fully explored in negotiations and publicly aired by emergency boards. These procedures take advantage of the fact that as long as negotiations continue between disputing parties there is chance of an agreement being reached. These procedures also recognize that the American people are fair and reasonable and that the working forces of our country should have a fair and square deal. There is nothing in the law which requires either employees or carriers to accept the conclusion of a presidential emergency board. There is nothing binding in such conclusions except the force of public opinion. However, having had access to all the processes of collective bargaining, and then having had the dispute heard and considered by an impartial fact-finding board, the implications are strong that the recommendations of such a board should in good grace be accepted by both parties as a proper basis for settling the dispute.

This lack of compulsion in the law is at one time its strength and its weakness. Its strength is measured by the effectiveness of the law in facilitating amicable settlements in thousands of disputes since its enactment in 1926. Its weakness is that too often in recent years emergency board recommendations have been circumvented in one way or another. Such action weakens the law and strikes at the very spirit which led to its enactment and effective application for so many years.

The act is the product of more than 60 years experience in the field of Federal legislation dealing with the settlement of railway labor disputes. As early as 1888 there was national concern over the danger to public health, safety, and welfare caused by tie-ups in railroad transportation. The product of this concern was the act of 1888. Continuously since that date there has been Federal law on the statute books for peaceful settlement of railway labor disputes in the interest of preventing interruptions to essential railroad transportation service. In its present form the essence of the law is to avoid interruption to the Nation's railroad transportation without resort to force. Our Nation could not afford such interruptions in 1888 and we can afford them even less in 1948.

Every action to circumvent procedures of the law in cases where an emergency threatens, weakens the act and brings a wave of public concern regarding other procedures for preventing interruptions to transportation service. The National Mediation Board feels that procedures of the law are adequate in their present form. They are built on the concept of balancing rights against responsibilities and preserving the maximum of freedom of action. This concept derives directly from American ideals of democracy and free enterprise. But these procedures cannot be disregarded indefinitely with impunity. As public opinion is the chief force behind the law so will this same public opinion force changes in the law if present procedures prove inadequate.

Both carriers and the employees have a heavy responsibility under the act to exert every reasonable effort to make and maintain labor agreements and to settle their disputes in order to avoid any interruption to interstate commerce.

Some of the ways in which these responsibilities are not being met by both sides have already been discussed. There are other ways, however, and notable among them is an attitude on both sides to get through direct negotiations and mediation in a hurried and perfunctory manner assuming no chance of settlement by these procedures and hastening referral of the dispute to an emergency board. The inherent danger in such attitudes was expressed forcibly by the emergency board which heard the 1948 wage and rules dispute involving enginemen and vard service employees:

We take this occasion, however, to point out to the parties a danger which is only highlighted in this particular instance and which is in fact manifest in many others of the proposals submitted to us. It is a danger which threatens the very foundations of the collective bargaining relationship which the employers and employees in this industry asked the Congress 22 years ago to confirm by law. It is a danger with which only the parties themselves can adequately cope.

The board was not asked, on this conversion rule issue, to resolve a question of principle. It was made, instead, the target for a barrage of conflicting arguments about a lot of little details. We were asked to find the answers to all these quibbles in a mass of evidence and testimony which covered 230 pages of exhibits and 150 pages in the record. This was to be done, within a 2-week period, as 1 little piece of a job which included the disposition of 36 other issues on the basis of well over 12,000 pages of testimony and exhibits.

To use the emergency board procedure in this fashion seems to us to defeat its purpose. The inadequacy of this particular recommendation reflects only a small part of the waste here. The time which was spent in trying to follow through all the minutiae of this issue, unsifted by the parties themselves during 2 years of bargaining, was time which could otherwise have been devoted to resolving the issues of basic principle involved in some of the other proposals. It is a mistake to call upon a board such as this, as part of an "emergency" procedure, to spend its time trying to unravel a tangle of wrapping string. That these parties were not able to accomplish, by negotiation, even this little kitchen job is cause for real concern. In our judgment this kind of failure has, so far as collective bargaining is concerned, malignant potentialities.

collective bargaining is concerned, malignant potentialities. We do not want to labor the point. We would be derelict, however, if we did not give warning of what we consider a bad wash-out on the track ahead. We repeat that the weakening of collective bargaining, reflected in the form in which this conversion issue came to us, was manifest as well in too many of the other issues in this case. We urge upon the parties that they start revitalizing the cooperative element in their relationship by working out satisfactory settlements of those issues which cannot possible be disposed of properly here.

The carriers and brotherhoods must reawaken to their responsibilities under the law. Only in this way can compulsory measures for dealing with railway labor disputes be avoided. The past success of the law is largely due to their cooperation in reaching orderly settlements. The Board feels certain that neither side would willingly tear down the successful plan which they worked so long to build. Stricter and more careful observance of their responsibilities will serve to avoid this undesirable result. The Board's views on this matter are born out of distrust in proposals for compulsion and prohibitions in the field of labor relations. It is greatly to the interest of both the carriers and the employees to help make the law work as intended.

During the fiscal year 1948, 16 emergency boards were created by Executive order of the President. A review of the disputes investigated by these emergency boards will be found in chapter V of this report.

Chapter II of this report, under the caption "Mediation Disputes," describes the Board's mediation activities during the fiscal year 1948, and outlines some of the problems in mediation with which the Board has been confronted. It also includes statistical tables showing the performance during the year compared with previous years in the Board's experience.

3. REPRESENTATION DISPUTES

Employees subject to the Railway Labor Act are free to join, organize, or assist in organizing a labor union of their choice. In exercising these rights the law protects employees against interference, influence, or discrimination by management.

The act provides for settlement of disputes between employees as to who are the duly authorized collective bargaining representatives. Where such disputes arise, the Board, on application of either party to the dispute, is required to investigate. In its investigation the Board is authorized to conduct a secret ballot or use any other appropriate method for determining the majority choice of the employees. Having determined the individual or organization designated and authorized by a majority of the employees the Board is required to certify the name of the representative to the employees and the carrier. The statute directs the carrier to treat with the certified representative for the purpose of effecting prompt settlement of all disputes respecting rates of pay, rules, and working conditions.

The Board requires applications for its services in representation disputes to be supported by a sufficient number of signed authorizations from the employees involved to establish the existence of a dispute. Such authorizations serve as prima facie evidence of a dispute and if verified by an on-the-ground investigation by one of the Board's mediators he is directed to conduct an election or use any other appropriate means for ascertaining the duly authorized representative of the employees.

After certifications are issued it is the policy of the Board not to conduct repeat election until the organization certified has had a reasonable period to function as the duly authorized representative of

the employees. Under rules promulgated by the Board effective May 1, 1947, a period of 2 years must elapse between representation elections. This policy derives from the law which imposes upon both carriers and employees the duty to exert every reasonable effort to make and maintain agreements. Obviously this basic purpose of the law cannot be realized if the representation issue is raised too frequently. In addition, representation elections and the organizing campaigns which necessarily precede them cause unsettled labor conditions and in many cases disturb employees substantially in the discharge of their duties.

The collective-bargaining unit under the Railway Labor Act is the craft or class. In representation cases dispute occasionally develops over the particular occupations to be included in the craft or class for the purpose of determining who shall participate in the election.

In determining craft or class issues the Board gives consideration to all relevant elements most important of which is the intent of the Railway Labor Act in settling disputes and promoting stable labor relations. Individual cases require consideration of facts peculiar to particular situations, but, in addition, there are general factors to be considered. These include the composition and relative permanency of employee groupings along craft or class lines on carriers generally as well as on particular carriers. The extent and effectiveness of past collective-bargaining arrangements, the functions, duties, and responsibilities of the employees, the general nature of their work and the community of interest existing between jobs are other factors consid-Previous decisions of the Board which bear upon the issues of ered. the particular dispute are also taken into account.

Over the years most of the main craft or class issues for railroad employees have been resolved. Thus there is a rather extensive body of precedents for settlement of such issues without the necessity for public hearings. Such issues as do require hearings usually involve border-line employees where the Board must determine whether they fall into one craft or class or another.

One craft or class issue determined during the year involved employees designated as yard dispatchers.² The disputed issue as presented by the contesting unions required the Board to determine whether yard dispatchers employed on the Nashville Terminals are in effect train dispatchers and therefore a separate craft or class for representation purposes under the act, or whether yard dispatchers are a part of the craft or class of clerical, office, station, and storehouse employees.

Following a public hearing the Board determined that the preponderant duties performed by the yard dispatchers involved are essentially the same as duties performed by crew clerks on railroads generally. Inasmuch as crew clerks are a part of the craft or class of clerical, office, station, and storehouse employees it follows that the so-called yard dispatchers involved are also a part of this same craft or class.

Other determinations made by the Board during the year involved air-line employees. In this industry organization for collective bargaining is still in its early stages and thus craft or class lines have not been so well established as on the railroads. In one case ³ involving employees of Braniff Airways the Board determined that stock clerks are a part of the craft or class of clerical, office, stores, fleet, and

² R-1876, Nashville Terminals. ³ R-1884, Braniff Airways, Inc.

passenger service employees. This determination reviewed and affirmed an earlier determination of the Board for this craft or class.

In another craft or class determination for air-line employees the Board found that meteorologists ⁴ constitute a separate craft or class for purposes of representation under the act.

During 1948, the Board considered and determined a novel problem raised by Northwest Airlines, a common carrier by air subject to title II of the act. A labor organization had filed an application with the Board for investigation of a representation dispute among wage earners generally described as mechanical department foremen or supervisors of mechanics. The carrier contended that any investigation by the Board of the alleged dispute was untimely and inappropriate in the absence of an order of the Interstate Commerce Commission defining the work performed by the persons above re-ferred to as that of employees or subordinate officials under the Railway Labor Act. The problem as thus presented questioned the right of the Board to determine whether wage earners employed by air lines are employees or subordinate officials within the meaning of the act. Following a public hearing and consideration of briefs filed by a large number of the air lines and labor organizations, the Board handed down a determination with an opinion in which it found as a matter of law that it had the authority and the duty to determine who are employees or subordinate officials of carriers by air pursuant to title II of the Railway Labor Act, as amended.⁵

In conducting representation elections the Board has for many years followed a policy of declining to certify a representative in cases where less than a majority of the eligible voters participated by casting valid ballots. This policy is based on section 2, fourth, of the act which provides that "the majority of any craft or class of employees shall have the right to determine who shall be the repre-sentatives of the craft or class." These provisions appeared to fully support the Board in declining certifications in cases where only a minority of the eligible employees participated in elections.

During the past year, however, this policy was challenged in a number of cases by labor organizations on the ground that the courts have construed the National Labor Relations Act and the Railway Labor Act to mean that a certification must be recognized when issued in cases where a majority of those participating in an election designated a representative regardless of the number of eligible voters actually casting valid ballots. To assist in reviewing its policy on this problem, the Board obtained an opinion by the Attorney General dated September 9, 1947. In his opinion the Attorney General said:

the National Mediation Board has the power to certify a representative which receives a majority of the votes cast at an election despite the fact that less than a majority of those eligible to vote participated in the election. While the National Mediation Board has this power, it need not exercise it automatically upon finding that a majority of those participated were in favor of a particular representative. In the exercise of its discretion in these matters, the Board may, for example, find it advisable to limit the application of the principle to cases in which the participation in the election is sufficiently substantial and representa-tive to warrant the presumption that "those who do not participate" * * * assent to the expressed will of the majority of those voting'.'

Under the Railway Labor Act it is the primary duty of carriers and employees "to exert every reasonable effort to make and maintain

С

⁵ See determination Northwest Airlines, May 26, 1948.

agreements concerning rates of pay, rules, and working conditions, and to settle all disputes * * * in order to avoid any interruption to commerce or to the operation of any carrier growing out of any dispute between the carrier and the employees thereof." The Board is of the opinon that this duty can more readily be fulfilled and stable relations maintained by a requirement that a majority of eligible employees cast valid ballots in elections conducted under the act before certifications of employee representatives are issued.

During the 14-year period since the Railway Labor Act was amended to provide for settlement of representation disputes, the Board has disposed of 2,021 such disputes. In 84 percent of these cases involving 712,181 employees, representation rights were established either by issuance of certifications or by voluntary recognition by the carrier managements involved.

The number of representation disputes continues large year after This is due to two chief factors. In the first place as knowledge vear. of the law becomes more widespread, employees not previously organized exercise their rights under the law and designate representatives for the first time. Secondly, many representation disputes originate in competition between rival labor oganizations. On the railroads and air lines representation disputes between A. F. of L. and C. I. O. affiliated unions are common. In addition, on the railroads many representation disputes in past years arose out of the rivalry between the standard train and engine service organizations. During 1948. however, such interunion disputes were notably absent from the Board's docket. This era of peace is substantially grounded in improved understandings and cooperation between the train and engine service organizations. The Board has commended the organizations on their improved relationships as a great contribution to stability in labor relations in this branch of railroad service.

During 1948, a total of 203 representation disputes were disposed of by the Board as compared with 181 during 1947. The Board's activities in this field are discussed in chapters II and III.

4. NATIONAL RAILROAD ADJUSTMENT BOARD

The National Railroad Adjustment Board was created by the 1934 amendments to the Railway Labor Act, to hear and decide disputes involving employee grievances and controversies over the application and interpretation of agreements.

The Adjustment Board is composed of four divisions, on each of which the carriers and the employees are equally represented. The groups of employees under the jurisdiction of each division are described specifically in section 3, first (h), of the act. The headquarters of the Adjustment Board are established by the law in Chicago, Ill.

When any division is unable to agree upon an award because of a deadlock among its members, the law requires the division to attempt to select a referee to sit with it as a member and render an award. Failing to agree upon the selection of a referee, this fact may be certified to the National Mediation Board, which is then required to make the appointment.

In past years the National Mediation Board has reported its concern over the problems arising out of failure of the First Division to make prompt awards in disputes involving train and engine service employees. This division is called upon to consider from four to five times as many disputes as the three other divisions combined. Failure of the First Division to effect procedures for disposing promptly of its large docket of cases has resulted in a steadily increasing backlog of pending disputes. Tiring of long delays awaiting awards, employee organizations have resorted to other techniques to secure settlements. Some of the organizations have withdrawn cases pending before the Division and declined to submit new cases, preferring to secure settlements by direct handling with the carrier management. Where such negotiations fail, strikes are sometimes threatened, thereby creating labor emergencies under provisions of section 5, first, of the In such cases, the National Mediation Board, in an effort to act. prevent interruptions to commerce, is bound by the law, to proffer its mediation services. As in previous years there were numerous situations of this kind during 1948. A great amount of time of the Board and its mediators was spent in preventing strikes in such situa-Time spent endeavoring to mediate disputes of this type is at tions. the expense of regular mediation cases. Where efforts to settle grievance disputes by mediation were unsuccessful, emergency boards were created by the President to forestall the threatened strike under provisions of section 10 of the act. During the past year four presi-dential emergency boards were created and one strike involving employees of the Southern Pacific Co. resulted from unsettled grievance disputes of this kind. Although the strike was of short duration it involved one of the largest railroads in the Nation, and even though the stoppage lasted only about 6 hours the damages and disarrangement incurred by shippers and the public was considerable.

Emergency boards appointed in such situations almost invariably point out in their reports that grievance cases should be decided by the First Division. Continuing with this thought one board ⁶ reported as follows:

"There can be no doubt that these disputes, in the course of orderly procedure, should be decided by the first division of that board." That was contemplated by the Railway Labor Act of 1934 and if the peaceful settlement of railroad labor disputes is to continue as it has existed in the past, we recommend that claims of the nature pending before us should be presented to the National Railroad Adjustment Board for decision.

But merely saying that grievances should be decided by the First Division is no solution in that it takes no cognizance of the reasons why employees have come to prefer other methods for securing settlement of their grievance cases. Failure of the First Division to effect practicable procedures has resulted in its inability to render awards promptly. Thus its backlog of pending cases grows to unmanageable proportions. By way of illustration, during 1948, the First Division disposed of 128 cases less than it docketed. It ended the year with 2,449 cases pending, or a 3-year backlog of work based on the number of cases closed during the year. Nor do these figures tell the whole story for, due to the long delays in securing awards, many cases which should normally be filed with the division are made the subject of a strike threat.

Commenting on procedures of the First Division the Southern Pacific emergency board reported on July 30, 1947, to the President as follows:

It is necessary at this point to allude to some of the factors which the board finds contributed to the vast accumulation of undisposed of grievance cases which

⁶ Emergency Board Report No. 51 of November 1, 1947, Atlanta & West Point & Western Ry. of Alabama.

were listed on the strike ballot. The principal cause of the accumulation of the large number of undisposed of claims is attributable directly to the procedure adopted by the First Division of the National Railroad Adjustment Board. That board does not, under its adopted rules, write reasoned opinions when preparing bipartisan awards, nor does it encourage such opinions by referees assigned to it. Such practice results in the accumulation of a vast number of awards that have no precedent value and prove of no assistance to application of rules purported to be interpreted by the awards when employed by the parties on the property. The strike ballot recites specific awards of the First Division of the Adjustment Board as being authority for the allowance of the claim. By reason of the almost telegraphic brevity of the awards cited, it is, in most instances, impossible to determine the controlling facts, much less the reasoning that prompted the award.

Many of the cases represented in this accumulation of unsettled claims have been held in abeyance by the parties in this dispute awaiting awards of the First Division which would have a precedent value and which would be of interpretive assistance in the determination of claims referred to, but which awards are not forthcoming in form suitable to be so utilized. We are of the opinion that should the rules of procedure of the First Division of the National Railroad Adjustment Board, as they now exist, be amended to provide for fully discussed and reasoned opinions, the same would be of inestimable value to the officials of both employer and employee charged with the responsibility of administering the working agreement and passing upon claims such as are present in this case.

It is the view of the National Mediation Board that the carriers and brotherhoods should endeavor to agree upon needed changes in the Division's rules of procedure to promote expeditious settlements. The continued inability of the Division to keep abreast of its docket is one of the most serious administrative deficiencies under the act. In making these recommendations the Mediation Board is fully aware of difficulties in the way of solution of this problem. Nevertheless, its seriousness demands the diligent efforts of both sides to agree upon a practicable solution. Their failure to agree will lead to a remedy through congressional action.

The work of the Adjustment Board during 1948 is reviewed in chapter VII and annual reports of the four divisions are given in appendix A. In addition, table 15 shows the number of cases docketed and disposed of by divisions for each year since 1945.

5. LABOR CONTRACTS

Section 5, third (e) of the Railway Labor Act requires all carriers subject to the law to file with the Board a copy of each contract with employees covering rates of pay, rules, or working conditions. The law also requires that changes, revisions, or supplements to such contracts shall be filed with the Board.

As of June 30, 1948, there was a total of 5,002 basic labor agreements on file with the Board. To note the increase in the number of agreements covering employees under the act it is interesting to compare the above total with 3,021, which is the number of such contracts on file on June 30, 1935. In addition to the basic contracts there are filed each year with the Board hundreds of supplemental agreements, revisions, and memoranda of understanding on various subjects.

Table 12 of this report shows the increase in the number of such contracts from year to year since the act was amended in 1935.

II. RECORD OF CASES

1. CASES HANDLED BY THE BOARD

Labor disputes subject to the jurisdiction of the National Mediation Board are generally divided into three different groups:

(1) Disputes involving representation of employees by various labor organizations for the purposes of collective bargaining.

(2) Disputes between carriers and their employees concerning changes in rates of pay, rules, or working conditions not adjusted by the parties in conference.

(3) The interpretation of agreements reached through mediation, where disputes arise between the parties as to the meaning or application of such agreements.

Disputes in the above three categories are designated for purposes of the Board's records as representation, mediation, and interpretation cases, respectively.

There was a moderate gain in 1948 over 1947 in the number of disputes of all types docketed and disposed of. Thus a total of 469 cases were docketed in 1948 as compared to 458 during the previous year. The comparable totals of cases disposed of are 464 and 423 respectively. By reason of gains in both categories there was only minor change in the backlog of pending cases; 134 at the end of 1948 as compared to 129 at the end of the previous fiscal year.

Although the backlog of total cases did not change greatly during the year there was a substantial change in the backlog of the two main types of disputes, i. e., representation cases and mediation cases. Thus the backlog of representation cases was reduced by more than one half, declining from 59 at the end of 1947 to 23 at the end of 1948. With such a small backlog of pending disputes it is possible to proceed with their investigation promptly as contemplated by the act. Contrasted to this reduction the number of pending mediation disputes rose from 69 to 111 during the year.

As reported in the 1947 report, settlement of mediation cases is retarded by the necessity of using a large proportion of the Board's staff of senior mediators in efforts to effect peaceful settlement of grievance disputes which, under the law, are referable for settlement to the First Division of the National Railroad Adjustment Board. In 1947 there was actually a reduction in the number of mediation cases settled for this reason. Thus the number of settlements was reduced from 379 in 1946 to 239 in 1947. There was a moderate increase in 1948 to 259 settlements but it will be seen that the total is still far short of the results obtained during 1946 with the same number of mediators on the staff. The problem was magnified during 1948 because of a sharp increase in the number of mediation cases Thus the total rose to 301 cases. This increase combined docketed. with relatively low number of settlements resulted in an increase in the backlog of pending mediation cases from 69 at the end of 1947 to 111 as of June 30, 1948.

Before applications are formally docketed they are subjected to preliminary investigation with a view of developing necessary information. This procedure serves a dual purpose. First, in a considerable number of instances preliminary investigation develops facts which show the application not in proper form for docketing and thus the matter can be disposed of through correspondence. Second, this procedure serves to clarify obscure points and thus facilitates the work of the mediator in his handling of the case. During 1948, a total of 51 applications were disposed of by correspondence as a result of this preliminary investigation. Adding these to the 469 applications which were docketed, makes a grand total of 520 applications for Board services received during the year. This compares with a grand total of 524 in 1947 and 504 during 1946.

TABLE 1.-Number of cases received and disposed of, fiscal years 1935-48

¹ Number of cases adjusted account recount of cases pending July 1, 1945.

Table 1 summarizes the various types of cases received and disposed of from June 21, 1934, when the Board commenced operations through June 30, 1948. During this 14-year period, a total of 4,904 new cases were docketed. The inclusion of 96 pending disputes inherited from the former board (United States Board of Mediation) increases to 5,000 the total cases requiring services since the present board was created. As of June 30, 1948, settlements had been effected in 4,866 of these cases. Except in the first year of the Board's operation, the number of mediation cases has run consistently ahead of representation cases. Mediation cases docketed during the 14-year period total 2,864 as compared to 2,020 representation cases. The percentage ratio is 58 and 41 for the two types of cases.

During the 14-year period, 20° interpretation cases have been disposed of by the Board. This number is considerably less than 1 percent of the total.

2. DISPOSITION OF CASES

During the fiscal year 1948, the Board disposed of 464 docketed disputes. This total includes 203 representation cases, 259 mediation cases and 2 interpretation cases. Table 2 summarizes by method of disposition all cases handled to conclusion during the 14 years of the Board's operation. Data for the past 4 years are shown separately and annual averages are shown for the 5-year periods 1935–39 and 1940–44.

REPRESENTATION DISPUTES

In the investigation of representation disputes under section 2, ninth, of the Railway Labor Act the Board is authorized to conduct elections by secret ballot or to utilize any other appropriate method of ascertaining the name of the duly authorized employee representatives. The law specifies that any method employed by the Board must insure the choice of representatives by the employees without interference, influence, or coercion exercised by the carrier.

Of the 203 representation disputes disposed of during the year, 113 were settled by secret elections. Thirty-seven of these elections were conducted exclusively by United States mail. In practically all elections it is necessary to send out some ballots by mail in order to afford voting oppertunity to those eligible employees who are off work due to sickness, vacations, or other reasons and are thus unable to vote at the polling place. In general, elections are conducted entirely by mail among groups where employees are too widely scattered to make a personal ballot-box election practicable. Usually, a personal ballot is preferable where the concentration of employees is rather large at the various voting points, or where the class of employees involved might have difficulty in executing a mail ballot. The method is determined by the Board in each case after consideration of the circumstances.

Fifty representation disputes were settled by checking signatures on authorization cards against signatures of employees as shown on carrier records such as canceled pay checks. This procedure is used in many cases where there is only 1 organization seeking representation of a group of employees and is usually confined to groups which have not previously been represented for collective-bargaining purposes. These 50 cases represent 25 percent of the total number of representation cases settled during 1948. The ratio for the 14-year period 1935–48 is 22 percent.

Of the remaining 40 representation cases disposed of during the

year, 7 were withdrawn prior to investigation of the dispute by one of the Board's mediators and 20 were withdrawn after such an investigation. Withdrawals are usually made when investigation shows an insufficient number of employee authorizations to warrant an election under applicable rules and regulations.

Two cases were closed without certification and the applications in 10 cases were dismissed. A more detailed discussion of cases closed under these various designations may be found in chapter III.

As shown in table 2, a grand total of 2,021 representation cases have been disposed of by the Board since 1934 when the Act was amended to provide for settlement of representation disputes. Of this number, 1,646, or 81 percent, were closed by issuing certifications following elections or verifying signatures on employee authorization cards In 61 additional cases carriers voluntarily recognized the applicant labor organizations as representing the employees without issuance of a certification. Thus collective-bargaining representation has been established for a total of 712,168 employees, or 91 percent, of the total of employees involved in all representation disputes disposed of by the Board during the period 1934-48.

MEDIATION DISPUTES

As a result of the Board's experience during the past 14 years, mediation agreements have been found to be the most satisfactory method of composing disputes concerning changes in rates, rules, and working conditions. A settlement voluntarily reached by the parties with the assistance of a mediator has in most instances been found to be better than a decision made by a third party in arbitration. Suggestions made by the mediator are often found to produce the means for effecting a settlement. An agreement reached through mediation follows a meeting of the minds of the disputants, and creates a better feeling between them which many times results in their being able to compose future differences without resorting to the services of the Board.

In some instances, disputes are settled by the parties during mediaation, and the application for mediation is withdrawn by the invoking party. In other cases, withdrawals are made to enable the parties to resume direct negotiations, either at the time or at some more suitable future date.

During the fiscal year 1948, 259 settlements were made through the processes of mediation. This figure represents an increase of 20 cases over the previous year. Of the 259 cases disposed of, 130, or approximately 50 percent, were settled by mediation agreements. The 130 mediation agreements made in 1948 show an increase of 20 over the number of mediation agreements made in the previous fiscal year.

Withdrawals by the invoking party during mediation totaled 24 cases, and 13 cases were withdrawn prior to mediation. Refusal to arbitrate by one or both parties accounted for the closing of 72 cases. Of this number, the carriers involved declined arbitration in 30 cases, the employees declined arbitration in 18, and in 24 instances both parties refused to arbitrate the issues in dispute. Included in the above total of 72 cases are 16 which were later considered by emergency boards created by Executive order under section 10 of the act.

After all efforts have failed to produce a settlement through mediation, the Board as its final action under the law must endeavor to induce the disputants to submit the controversy to arbitration. Acceptance of arbitration is optional. During the fiscal year 1948 disposition of 18 cases was made through arbitration agreements. In the 14 years of the present Board's existence under the Railway Labor Act, a grand total of 106 agreements to arbitrate have been made.

The mediation process as a whole, including mediation agreements, withdrawals during mediation, and agreements to arbitrate resulted in the disposition of a total of 172 cases. This figure compares with 152 settlements by these three methods during the preceding fiscal year. In the year 1948, cases so settled accounted for 66 percent of the total of 259 mediation cases disposed of. The percentage of dispositions by these three methods during the full 14 years of this Board's experience is approximately 72.

PROBLEMS IN MEDIATION

As in previous years, many applications for mediation were made in cases where only superficial and perfunctory negotiations had been conducted between the parties. In some instances of this kind, the disputants were requested to conduct further negotiations, and really attempt to observe the requirements of the Railway Labor Act that both parties to a dispute should make every effort to compose their differences in direct negotiations. Honest and sincere efforts toward this end would save much time and effort of both the parties and the Board's representatives in mediation proceedings.

Another mediation problem during 1948 was caused by action of the train and engine service brotherhoods threatening strikes as a means of forcing settlement of grievance disputes which, under the act, should be settled by the First Division of the National Railroad Adjustment Board. This problem is referred to here and is discussed in some detail in chapter I.

In a few instances, in the main involving organizations which have had a relatively short experience under the Railway Labor Act, strike threats have been made during or immediately after direct negotiations on rate and rules changes; and without request for the mediation services of the Board. Such action may have been taken in line with a "direct action" policy of the organization, or with the view of bringing about immediate intervention by the Board in a proffer of mediation. This situation has been encountered more frequently in cases involving the air carriers. It is urged that all disputes arising under section 5, first, of the act be handled in the manner that the law provides, by affording the Board the opportunity to handle these controversies in an orderly manner as contemplated by the law. Strike threats made with the view of forcing immediate mediation proceedings produce situations where mediation is conducted under the presence of the threat, an unhealthy atmosphere for bringing about an equitable settlement, as well as having the effect of placing at a disadvantage the organizations which are handling their disputes under the orderly processes of the law.

During the past year the Board has experienced a recurrence of mediation cases which involve essentially jurisdictional disputes between two labor organizations. Applications for mediation in such instances are usually made by one organization, but the requests made upon the carrier, if granted, would conflict with agreements which the carrier has with another organization. Disputes of this nature are difficult, if not impossible, to settle in mediation, since a settlement, if effected, must be made primarily between the two organizations involved, one of which is not officially a party to the case. Some settlements of this nature have been made in mediation, but only after protracted mediation with representatives of the opposing organiza-The National Mediation Board cannot decide such jurisdictions. tional questions. It can only mediate them. A greater degree of cooperation among the organizations themselves would have the effect of relieving the Board of its duty to handle cases of this nature.

Lastly, the problem of subcontracting work has arisen on certain air carriers during the past fiscal year. Contracts have recently been entered into between various air carriers and so-called independent contractors purporting to turn over certain kinds of work customarily performed by the carrier's employees and paid for under applicable labor agreements negotiated under the provisions of the Railway Labor Act. For example, (1) overhauling air craft instruments, (2) cargo handling, (3) guards, (4) porter service, etc.

In a recent case involving the negotiation of an initial agreement for clerks on the National Airlines, the insistence of this carrier for the unrestricted right to contract out work whenever it saw fit to do so was a major factor in a strike of its clerical and maintenance employees. This strike has been in effect since January 23, 1948. On June 23, 1948, the President created an emergency board and directed it to investigate and report on this dispute. It is to be hoped that the emergency board by its recommendations will courageously resolve the question of subcontracting or set forth a fair and conslusive procedure for disposing of this disturbing and far-reaching question. If the emergency board succeeds then the several similar disputes now on the Mediation Board's docket should be settled with fairness to all.

The contract system is not an innovation of the air carriers. It existed to a limited degree on rail carriers prior to the enactment of the Transportation Act of 1920, but the United States Railroad Labor Board created under that act put an effective end to subcontracting on rail carriers insofar as it violated the law or labor agreements. In its controlling decision No. 982, issued May 9, 1922, the Railroad Labor Board said that—

No more important dispute has ever come before the Labor Board for adjudication. It goes to the vitals of the Transportation Act. If the carrier can legally do the thing which has been done under these contracts, then the entire Transportation Act can be nullified and the will of the Congress of the United States set at naught.

and in its decision the Board held that subcontracting was in violation of the Transportation Act insofar as it was construed by the carriers to remove employees working thereunder from said act, and that it was in violation of labor agreements covering wages and working conditions. Moreover, by this decision carriers were directed to take up the matter of reinstatement of any employee upon application of his representative.

The rail carriers and their employees met the subcontracting problem in a realistic fashion and through negotiation found a limited area of work which may be excepted from labor agreements or which may be coordinated for handling by two or more carriers merging or pooling their facilities and compensating displaced employees. Thus it will be seen that negotiations offer a much better method than strikes for the settlement of subcontracting problems.

3. CARRIERS INVOLVED IN DISPUTES

Table 3 indicates the distribution of the Board's services among the various classes of carriers. During the year 130 class I carriers by railroad reported to the Interstate Commerce Commission. Approximately 95 percent of the Nation's railroad workers are employed on these carriers and as would be expected it was on such carriers, rather than the smaller railroads, that most of the Board's services were utilized. Thus of the 130 class I carriers 123 or 95 percent were involved in disputes considered by the Board during the year.

It should also be noted that during 1948 the Board considered disputes involving employees of 32 different air lines. Table 3 shows a classification of the different kinds of disputes involving these air lines.

4. MAJOR GROUPS OF EMPLOYEES INVOLVED IN CASES

Table 4 shows the number of cases settled during the year classified according to the major groups of employees involved. As in previous years train, engine, and yard service employees accounted for the largest number of disputes among railroad workers. Other crafts or classes accounting for a large number of disputes are clerical, office, station, and storehouse employees, and maintenance of equipment employees.

While disputes among railroad workers constitute the major portion of the Board's work the rapid growth of air-line transportation since the end of World War II has been accompanied by a comparable growth in the number of labor disputes among employees of this industry. Thus, in 1948, air-line employees accounted for 96 disputes, or 21 percent, of the cases disposed of by the Board during the year. This compares with 10 percent in 1946 and 5 percent in 1945. Growth in the number and size of air lines has been accompanied by an increase in the groups of air line employees desiring to bargain collectively under terms of the law. Particularly noted among such groups during 1948 were meteorologists, navigators and mechanical foremen.

III. REPRESENTATION DISPUTES

1. ELECTIONS AND CERTIFICATION OF REPRESENTATIVES

The Board received and docketed 167 representation disputes during the fiscal year 1948. This number added to the 59 cases pending on the docket at the beginning of the year makes a total of 226 representation cases requiring service of the Board. Of this total, 203 were disposed of during the year leaving 23 disputes pending on the Board's docket on June 30, 1948.

The number of representation disputes docketed during 1948 is smaller than in any year since 1944. This, together with the fact that none of the disputes disposed of during 1948 involved an abnormally large number of employees, enabled the Board to reduce its backlog of pending disputes from 59 to 23 during the year. The Board favors keeping its backlog of pending disputes low for this permits assignment of mediators to newly docketed cases with minimum delay.

The desirability of prompt investigation of representation disputes was recognized by the Congress by including in section 2, ninth, of the Railway Labor Act, provisions requiring the Board to investigate such disputes and issue certifications within 30 days after receipt of applications for service. Although the courts have held this requirement to be directory rather than mandatory,¹ the Board strives to investigate such disputes as promptly as practicable in the interest of promoting stable labor relations.

During 1948, a total of 167 representation disputes were docketed as compared with 209 during the previous year. One major factor contributing to this decline was a substantial decrease in the number of interunion disputes over representation. There was no noticeable slackening in contests between A. F. of L. and C. I. O. organizations for employee representation rights. There was, however, a very substantial drop in such disputes between the standard train and engine service organizations. Chief among such disputing organizations in former years were the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen over representation rights of engine service employees. Such disputes were usually accompanied by keen rivalry and bitterness often developed. During the past year these two organizations have been endeavoring to combine their organizations and have called a truce in efforts to win each other's representation rights. In former years similar contests were waged by the Order of Railway Conductors and The Brotherhood of Railroad Trainmen but during the past year a truce has also been effected by these organizations. These four organizations, together, represent substantially all of the Nation's railroad train and engine service employees. The Board has always discouraged disputes between them as a needlessly disturbing factor in railroad labor relations and is pleased to report and encourage the prevailing cra of peace.

As stated above, a total of 203 representation cases were disposed of during 1948. This is an increase of 22 cases or 12 percent over the

¹District Court of the United States for the Eastern District of Virginia, Equity No. 329, System Federation No. 40 v. Virginian Ry. Co., decided July 24, 1935.

number disposed of in the previous year. This increase was achieved by reason of the fact that none of the 1948 cases involved an unusually large number of employees, as in 1947. Thus, the largest case handled in 1948 involved some 5,600 clerical, office, station, and storehouse employees of the Atlantic Coast Line Railroad. By comparison, one case was settled during 1947 involving some 52,000 shop-craft employees of the Pennsylvania Railroad. This latter total is more than the total of employees involved in all of the 1948 cases combined. Conducting elections among such large groups of employees requires more time and the services of more mediators with a resultant reduction in the number of cases disposed of.

The Railway Labor Act requires that representation disputes be resolved by crafts or classes. Many docketed cases involve more than one craft or class and some involve as many as six or seven separate crafts or classes. Thus, the number of crafts or classes involved in representation disputes during 1948 is greater than the number of cases settled. Table 5 shows a total of 225 crafts or classes in the 203 cases disposed of in 1948.

The total number of employees involved in representation cases settled dropped from 98,100 in 1947 to 37,284 in 1948. As already indicated, this decline is due to the fact that no unusually large representation case was closed during 1948 which is in direct contrast to the previous year. Prospects for 1949 are for an upturn in the totals of employees in such disputes. This was indicated by two¹ cases under investigation as of June 30, 1948, which together involved some 22,000 employees.

Of the 203 representation cases disposed of during 1948, certifications were issued in a total of 163 cases involving 182 crafts or classes. Thus, during the year representation rights were established by certifications for a total of 30,216 employees. In the remaining 40 cases, 28 were withdrawn by the applicant organizations and 2 were closed without certification when, following elections, the count of ballots showed an insufficient number of valid votes to constitute a legal majority. During the fiscal year the Board changed the designation for closing such cases from closed without certification to dismissal. There were 6 additional cases in which an insufficient number of employees cast valid ballots to constitute a legal majority in which the applications were dismissed. The applications in 3 cases were dismissed when it was determined that the employees covered by the applications constituted only part of an established craft or class. The application in one case was dismissed when investigation disclosed an insufficient number of authorization cards from the employees to warrant conducting a representation election.

During the fiscal year, 24,320 employees participated in cases where elections were conducted or authorizations were checked. This constitutes 79 percent of the employees involved in such cases. The percentage of employee participation has remained high throughout the years the Railway Labor Act has been in effect and shows the high regard employees generally have for exercising their right to select collective bargaining representatives.

Table 5 below shows, for the 14 year period 1935–48, the number of representation cases, crafts or classes, employees involved and participating in elections, subdivided by methods of disposition.

TABLE 5.—Number of cases, crafts or classes, and employees involved in representation disputes, by method of disposition, fiscal years 1935-48

2. MAJOR GROUPS OF EMPLOYEES INVOLVED IN REPRESENTATION DISPUTES

Table 6 summarizes representation disputes settled during the year according to major occupational groups. As in previous years, train, engine and yard-service employees accounted for the largest number of cases. The table also records that these same groups accounted for the largest number of employees involved in cases settled during 1948.

 TABLE 6.—Number of crafts or classes and number of employees involved in representation cases, by major groups of employees, fiscal year 1948

¹ Less than one-half of 1 percent.

In past years maintenance of equipment employees have accounted for the major portion of employees involved in representation disputes. However, over the years since 1934, such employees have been gradually won over to the international shop-craft organizations functioning through the Railway Employees' Department, A. F. of L. By the end of 1948, these organizations represented some 95 percent of the nations' railroad shop-craft employees. As a result there has been a rather steady decline in the proportion of representation disputes involving such employees to the total settled by the Board each year. The following tabulation shows the trend over the period 1938-48 in representation cases involving maintenance of equipment employees The totals for employees as compared to other representation cases. during the years 1946 and 1947 are abnormally large because in each of those years elections were conducted among some 52,000 shop-craft employees of the Pennsylvania Railroad.

	Ca	ses	Crafts o	r classes	Employees			
Fiscal Year	Number	Percent of Total	Number	Percent of Total	Number	Percent of Total		
1948	. 22	11	36	16	3, 706	10		
1947	. 16	9	37	17	65, 924	67		
1946	25	12	42	16	68, 549	54		
1945	. 35	18	52	22	4,566	13		
1944	15	11	34	19	20, 977	55		
1943		15	60	26	6,867	22		
1942	. 26	18	69	35	22, 359	52		
1941	. 33	26	66	38	16,000	60		
940	21	22	39	34	9,948	52		
1939	. 28	33	86	57	55, 604	84		
1938	. 40	29	128	52	28, 478	55		

The increase in representation disputes among air-line employees noted in the 1947 report continued during 1948 though not at such a fast rate. Thus, of the 203 cases settled during the year 46 or 23 percent involved air-line employees. Practically all of these air-line cases involved employees who were securing collective-bargaining representation rights for the first time. The organizing activity among clerical and office employees and stewardesses noted in 1947 was continued during 1948. Most of the air-line mechanics representation cases disposed of involved relatively small feeder lines.

3. TYPES OF REPRESENTATION DISPUTES

For purposes of this report, representation disputes may be divided into two major groups. First, are those between national organizations or local unions and system associations, or unorganized employees. Second, are the interorganizational disputes between two national organizations or two local unions or between a national organization and a local union. In general, disputes of the first group represent efforts of employees to secure bona fide collective-bargaining representation for the first time. Disputes of the second group represent competition between unions for employee representation.

Table 7 shows the distribution of all representation cases disposed of during 1948, by types of organizations, with the number of crafts or classes and employees involved for the 14-year period 1935-48.

It will be noted in the table that 65 percent of the employees involved in representation cases were in contests between unions for employee representation rights. This is contrasted to 35 percent of the employees being involved in cases where the employees were not previously represented or were represented by system associations. This proportion has gradually decreased over the years since 1934 and reflects approaching completion of unionization among railroad employees. Deviations from this trend as shown for 1946 and 1947 are accounted for by the shop-craft elections among maintenance-ofequipment employees of the Pennsylvania Railroad.

Most of the interunion disputes handled to conclusion during 1948 were contests between A. F. of L. and C. I. O. unions or between such unions and unaffiliated national organizations. The Board is pleased to report that there was a very commendable decline during 1948 in the number of interunion disputes between the standard train and engine service organizations.

Elections. Proved authorizations											

¹ Or proved authorizations. Does not include void ballots. ² Includes only cases in which elections or checks of authorizations were held and certifications issued. See table 6 for distribution of all representation cases.

As in previous years the data show that the vast majority of employees involved prefer representation by national labor organizations in preference to local unions or system associations. Of the 182 crafts or classes for which certifications were issued, 175 were in favor of national organizations, 5 were for local unions and 2 for system associations.

Certifications were issued for 105 crafts or classes of employees who were previously represented by system associations or had no representation at all. Of this number, national organizations were certified for 103 crafts or classes and system associations for only 2. The vote totals were likewise overwhelmingly favorable to national organizations. Thus, of a total of 7,172 votes in cases of this group, 6,451 were cast for national organizations or 90 percent.

Table 9 shows the distribution of representation rights among national organizations, local unions, and system associations. Data in the table are broken down by crafts or classes, number of employees involved and percentages according to all certifications issued during 1948.

During the year certifications were issued in 163 cases. The wishes of the majority of employees were determined by elections in 115 of these cases and by validating signatures on employee authorization cards in the remaining 48 cases.

In the 163 cases representation rights were established for 182 separate crafts or classes involving a total of 30,116 employees. Of this total, representation rights were acquired for the first time for 10,786 employees and were changed for 11,607 employees. Elections were conducted in cases involving 7,723 employees in which they chose by majority vote not to change their collective bargaining representatives.

National organizations were certified as collective bargaining representatives for 93 percent of the crafts or classes and 86 percent of all employees involved in cases where certifications were issued.

5. EXTENT AND NATURE OF LABOR REPRESENTATION

Table 10 shows by organizations and crafts or classes the number and mileage of principal rail carriers whose employees were represented by various organizations as of June 30, 1948. The table also includes for comparative purposes the percentages, in previous years, of mileage of carriers on which employees were represented by organizations. The total mileage used in this table is derived by adding the mileages of carriers listed in table 14 on which table 10 is based.

IV. MEDIATION DISPUTES

During the fiscal year 1948, mediation cases disposed of totaled 259, this being an increase of 20 over the previous year, but a decrease of 120 under the fiscal year 1946. While there was an increase in dispositions in 1948 over 1947, the total as compared with the year 1946 continued the decrease shown in 1947, and mainly for the same reasons. A large amount of time was spent again in 1948 on several cases containing great numbers of grievances and time claims, which under section 3 of the act should have been taken to the National Railroad Adjustment Board.

. During the year 1948 a total of 301 mediation cases were docketed, this number being an increase of 56 over the previous year. This total has been exceeded only once in the Board's past experience, by the figure of 358 mediation cases docketed in the fiscal year 1945. As of June 30, 1948, there were 111 mediation cases on the docket open and unsettled, as compared with 69 on hand as of June 30, 1947.

1. MEDIATION AND ARBITRATION AGREEMENTS

Of the total of 259 mediation cases settled during the year, 185, or about 71 percent, were disposed of either by mediation agreements, arbitration agreements, or withdrawals prior to, during, or after mediation. Sixteen disputes were referred to emergency boards created under section 10 of the Railway Labor Act.

For the 14-year period of the Board's existence under the amended act, the percentage of mediation agreements to total mediation cases is a little over 53. This figure has remained constant for the past few years. This percentage for the performance during the fiscal year 1948 is approximately 50, which shows an increase of 6 percent over the previous year of 1947. The time spent in mediating cases involving large grievance dockets is again reflected in the slight decrease of 3 percent under the 14-year average.

As shown by table 11, above, two principal categories of questions were involved in mediation cases, viz, changes and revisions in the rules of working agreements, and changes in rates of pay. These classes of disputes continue to provide the greatest portion of the Board's work.

Issues involved	14-year period	1948	1947	1946	1945	A verage for 5-year period 1940–44	Average for 5-year period 1935–39
Total, all cases	1, 512	130	105	227	199	117	54
Negotiation of new agreements covering rates of pay, rules, and working conditions Changes in rates of pay Changes and revisions in rules of existing agree-	188 523	12 26	7 36	22 48	15 95	15 50	12 14
ments Miscellancous cases	730 71	77 15	56 6	156 1	86 3	46 6	25 3

TABLE 11.—Issues involved in cases disposed of by mediation agreements, fiscal years 1935-48

During the year 1948, a total of 18 cases was disposed of by arbitration under the provisions of section 7 of the Railway Labor Act. A brief description of the awards made in these cases is given in chapter V of this report.

2. OTHER ADJUSTMENTS OF MEDIATION CASES

Of the 259 mediation cases closed during the year 1948, disposition was effected in 111 through means other than mediation or arbitration agreements. The largest single group in this number was a total of 30 cases in which arbitration was declined by the carriers involved. Twenty-four cases were withdrawn during or after mediation while 13 cases were withdrawn by the invoking party before mediation proceedings were commenced. A grand total of 72 cases were closed account refusals to arbitrate. In 18 instances, arbitration was declined by the employees, and in 24 cases both parties refused to arbitrate the issues. As mentioned above, the carriers declined arbitration in 30 cases. Two cases were dismissed by the Board.

3. AIR LINE MEDIATION CASES

Included in the 259 mediation cases handled and closed during the fiscal year ended June 30, 1948, were 50 cases involving commercial air lines subject to title II of the Railway Labor Act. This number represents approximately 19 percent of the total mediation cases disposed of, and is an increase of 12 over the 38 air-line mediation cases handled during the year 1947. Several of these 50 cases involved the negotiation of initial working agreements, and a number of others covered complete schedule revisions. Protracted mediation was necessary in a large number of these 50 cases, and it is estimated that approximately 25 percent of the entire time spent on mediation cases was devoted to these air-line disputes.

During the fiscal year 1948, a total of 46 representation cases were handled covering various crafts or classes of air-line employees.

Up to June 30, 1947, a total of 111 mediation cases had been handled on the air lines since title II of the Railway Labor Act became effective in 1936. The 50 cases disposed of during 1948 brings the grand total to 161 as of June 30, 1948.

V. ARBITRATION AND EMERGENCY BOARDS

1. ARBITRATION BOARDS

In disputes where the National Mediation Board or its representatives are unable to effect a settlement through mediation, they are required to try to induce the parties to submit their controversy to arbitration. While acceptance of arbitration is not compulsory, under section 7 of the Railway Labor Act, the Mediation Board emphasizes the spirit and intent of the law to settle disputes peaceably. Accordingly, the Board does not consider the proffer of arbitration as a perfunctory action, but rather that efforts to induce the parties to submit their differences to arbitration should be equally as intensive as those made in attempting to secure settlement by mediation. Arbitration under the act has the additional advantage of providing a definite and legally enforceable decision under which both parties to a dispute may operate in the future.

During the fiscal year 1948, 18 arbitration agreements were executed, making a total of 106 such agreements effected through efforts of the Board during the 14 years of its existence.

Arbitration cases disposed of during the 1948 fiscal year are briefly summarized below:

CASE A-2157, ARB. 59.—Amalgamated Association of Street, Electric Railway and Motor Coach Employes of America and Salt Lake and Utah Railroad Corp.

An arbitration agreement was entered into by the parties on December 5, 1945. Prior to arbitrators being named, however, advice was received that the carrier had abondoned its operations. On the basis of this fact, the case was closed on the Board's files on July 28, 1947.

CASE A-2384, ARB. 82.—Brotherhood of Railroad Trainmen and Southern Pacific Co. (Pacific Lines)

Members of the Arbitration Board were Hon. Robert G. Simmons, chief justice, Supreme Court of Nebraska, Lincoln, Nebr.; Mr. G. W. Crawford, vice general chairman, Brotherhood of Railroad Trainmen; and Mr. J. W. Corbett, general manager, Southern Pacific Co. (Pacific Lines). Judge Simmons was named by the National Mediation Board as neutral arbitrator, the party members having been unable to agree upon a neutral.

Before the Arbitration Board convened, however, the controversy was settled and disposed of by agreement of the parties, and the case was, therefore, closed.

CASE A-2501, ARB. 86.—Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Missouri Pacific Railroad Co.

Members of the Arbitration Board were Hon. Sidney St. F. Thaxter, associate justice, Supreme Judicial Court of Maine, Portland, Maine; Mr. O. M. Stevens, president and general manager, American Refrigerator Transit Co., representing the carrier; and Mr. A. J. Pickett, general chairman, M-K-T Lines System Board of the Brotherhood of Railway and Steamship Clerks. The party members designated Judge Sidney St. F. Thaxter as the neutral member and chairman of the board. The question in dispute was requested increases in rates of pay for timekeepers, accountants, clerks, and stenographers represented by the organization. Arbitration hearings commenced in St. Louis, Mo., February 16, 1948, and the award was dated February 21, 1948. In its award a majority of the board fixed the rates of pay applicable to each of the positions involved. Mr. O. M. Stevens, carrier arbitrator, filed a dissent.

CASE A-2522, ARB. 89.—Brotherhood of Railroad Trainmen and Erie Railroad Co.

Members of the Arbitration Board were Mr. Frank M. Swacker, attorney, New York, N. Y.; Mr. M. G. McInnes, assistant general manager, Erie Railroad Co.; and Mr. J. P. Cahill, deputy president, Brotherhood of Railroad Trainmen. The party members designated Mr. Frank M. Swacker is the neutral member and chairman of the board.

The question submitted to the board for decision was the request of employees for 99 cents per day increase in pay of trainmen being paid the mine-run rate on the Erie System. Arbitration hearings commenced in Cleveland, Ohio, on July 8, 1947, and the award was dated July 18, 1947, in which an additional 7 cents per hour was awarded on certain divisions because of the combination character of their work, it being both road and yard work.

CASE A-2550, ARB. 90.—American Train Dispatchers Association and Boston & Maine Railroad

An arbitration agreement was signed between the parties on June 3, 1947, and party arbitrators were appointed. The party members could not agree on a neutral member of the Arbitration Board, and before a neutral was appointed by the National Mediation Board, the parties to the dispute by mutual agreement canceled the arbitration agreement in November 1947. The case was, therefore, closed.

CASE A-2595, ARB. 91.—Carriers represented by Eastern, Western, and Southeastern Carriers' Conference Committees and Employes' National Conference Committee—Seventeen Cooperating Railway Labor Organizations

Members of the Arbitration Board were Dr. William M. Leiserson, former member of the National Mediation Board, Washington, D. C.; and Dr. Robert D. Calkins of New York, N. Y.; Mr. George M. Harrison, grand president, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes; Mr. George Wright, vice president, International Brotherhood of Firemen & Oilers; Mr. H. A. Scandrett, retired president of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co.; and Mr. J. Carter Fort, vice president and general counsel of the Association of American Railroads, Washington, D. C. The party members designated Dr. William M. Leiserson and Dr. Robert D. Calkins as the neutral members, and as chairman and vice chairman, respectively, of the board.

This case involved the request of the employees to increase all existing rates of pay by 20 cents per hour, effective April 25, 1947, and that the amount of the hourly increase for employees represented by the American Train Dispatchers Association and the Railroad Yardmasters of America be multiplied by 240 hours to produce the amount of the monthly increase.

This dispute was Nation-wide in scope, involving most of the railroads in the country and approximately 1,000,000 employees.

Public hearings were held in Chicago, Ill., from August 4 to August 28, 1947, inclusive. The record consists of 3.252 pages and approximately 38 exhibits. In its award, dated September 2, 1947, the board awarded an increase of $15\frac{1}{2}$ cents per hour, effective September 1, 1947. With respect to the application of this increase to the train dispatchers and railroad yardmasters, the board found that the increase should be multiplied by 240 hours per month to determine the amount of the monthly increase. The carrier arbitrators dissented from this award.

CASE A-2552, ARB. 92.—Pacific & Arctic Railway & Navigation Co. and International Longshoremen's Association

Members of the Arbitration Board were Mr. Robert Burns, attorney, of Portland, Oreg.; Mr. Edward G. Dobrin, attorney, of Seattle, Wash., representing the carrier; and Mr. Morris D. Kennedy, president, Western Stevedoring Co., Seattle, Wash., representing the organization.

The party members of the Arbitration Board being unable to agree upon the third arbitrator, the National Mediation Board designated Mr. Robert Burns as the neutral arbitrator, and he was elected to serve as chairman of the board.

The question in this dispute was whether certain handling of freight and cargo on the wharf of the carrier at Skagway, Alaska, should be classed as railroad warehouse work or as dock work. Arbitration hearings were held in Seattle, Wash., commencing September 16, 1947, and the award was dated October 4, 1947. The majority of the board found that the work in question should be classed as dock work. The carrier arbitrator filed a dissent.

CASE A-2572, ARB. 93.—Northwest Airlines, Inc., and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

Members of the Arbitration Board were Mr. Q. D. Gibbs, attorney, of Okmulgee, Okla.; Mr. A. E. Floan, vice president and secretary, Northwest Airlines, Inc.; and Mr. H. D. Ulrich of Boston, Mass., representing the organization. The party members being unable to agree upon a neutral, the National Mediation Board appointed Mr. Q. D. Gibbs as the neutral arbitrator and he was elected chairman of the board.

The question submitted to arbitration involved an increase in rates of pay for employees represented, of 30 cents per hour. Hearings were held in St. Paul, Minn., commencing October 28, 1947, and the award was dated November 1, 1947. In its award the Arbitration Board granted pay increases of 10 cents per hour, effective October 1 1947. A dissent to this award was filed by the organization arbitrator,

CASE A-2606, ARB. 94.—Pan American Airways, Inc., and Transport Workers Union of America, CIO

Members of the Arbitration Board were Mr. David L. Cole of Paterson, N. J.; Mr. Lloyd W. Messersmith, representing the organization; and Mr. W. Overton Snyder of Pan American World Airways, carrier arbitrator. The party members designated Mr. David L. Cole as the neutral member and chairman of the board.

The questions submitted to arbitration included job classifications and rates of pay of flight service personnel, as well as changes in rules and working conditions. Arbitration hearings were commenced in New York City on December 8, 1947, and the award was dated December 16, 1947.

The board awarded a portion of the wage increases demanded by the organization, and denied a rules change with respect to furnishing and cleaning uniforms. The board also concluded that the contract between the parties should continue in effect for 1 year, and denied the carrier's proposal to eliminate from the agreement a requirement with respect to assignment of at least one purser when two or more flight service personnel are assigned to a flight. Mr. Snyder dissented from the award regarding increases in rates of pay.

CASE A-2608, ARB. 95.—Pan American Airways, Inc., and Air Line Dispatchers Association

Members of the Arbitration Board were Hon. James H. Wolfe, justice, Supreme Court of Utah, Salt Lake City, Utah; Mr. W. O. Snyder, Pan American World Airways, Long Island City, N. Y., representing the carrier; and Mr. J. E. Frost of Seattle, Wash., representing the organization. The party members designated Judge James H. Wolfe, as the neutral member and chairman of the board.

The matters submitted to the board related to schedule of salaries for junior aircraft dispatchers and aircraft dispatchers, and the effective date thereof. Arbitration hearings were held in Salt Lake City, Utah, commencing October 24, 1947, and the award was dated October 30, 1947. In its award the Arbitration Board granted certain pay increases, setting out a scale of minimum salaries to be effective November 1, 1947, and June 30, 1948.

CASE A-2596, ARB. 96.—Pan American Airways, Inc., and Transport Workers Union of America, CIO

Members of the Arbitration Board were Hon. Otto S. Beyer, former member of National Mediation Board, of Washington, D. C.; Mr. W. Overton Snyder, Pan American World Airways, Long Island City, N. Y., representing the carrier; and Mr. M. L. Edwards of Miami, Fla., representing the organization. The party members being unable to agree upon the third arbitrator, the National Mediation Board designated Hon. Otto S. Beyer as the neutral arbitrator, and he was elected to serve as chairman of the board.

The questions in this case related to rates of pay for guards and assistant chief guards, shift differentials, vacations, and effective date and duration of agreement between the parties.

Hearings were held in Miami, Fla., commencing on November 24, 1947, and the award was dated November 28, 1947. In its award the Arbitration Board granted certain increases in rates of pay and shift differentials, although less than requested by the organization; it denied the request for change in the vacation rule; and made the agreement effective as of November 1, 1947, until January 1, 1949, and thereafter until written notice 30 days prior to December 31st in any year.

CASE A-2659, ARB. 97.—Northwest Airlines, Inc., and International Association of Machinists

Members of the Arbitration Board were Dr. William M. Leiserson of Washington, D. C.; Mr. K. R. Ferguson, company arbitrator; and Mr. George H. Pedersen, organization arbitrator. The party members designated Dr. William M. Leiserson as the neutral arbitrator and chairman of the board.

The questions in dispute comprised requested increases in rates of pay for mechanics and related personnel and flight kitchen personnel, and various changes in rules and working conditions. Arbitration hearings were held in St. Paul, Minn., commencing November 10, 1947, and the award was dated December 4, 1947. In its award the Arbitration Board granted certain increases in rates of pay, and changes in rules and working conditions with some modifications. The principal changes involved master mechanic ratings, holidays, vacations, shift premiums, length of service computations, and longevity allowances.

CASE A-2631, ARB. 98.—Northwest Airlines, Inc. and Air Line Dispatchers Association, A. F. of L.

The arbitration agreement in this case was signed by the parties on October 9, 1947, and Mr. A. E. Floan, vice president and secretary, was appointed as the carrier arbitrator; and Mr. B. F. Napheys, Jr., attorney, of Denver, Colo., was named as the organization arbitrator. Mr. Frank M. Swacker, attorney, New York, N. Y., was selected by the parties to serve as neutral arbitrator, and certificate of his appointment was dated December 23, 1947. On that same date, however, the dispute was withdrawn from arbitration by mutual agreement of the parties and the case was closed accordingly.

CASE A-2658, ARB. 99 AND INTERPRETATION.—Transcontinental & Western Air, Inc., and International Association of Machinists

Members of the Arbitration Board were Dr. John A. Lapp, industrial relations consultant, Chicago, Ill.; Mr. John O. Parker of Kansas City, Mo., representing the carrier; and Mr. George H. Pederson of Milwaukee, Wis., representing the organization. The party arbitrators selected Dr. John A. Lapp to be the third member of the board and he was elected chairman.

The Arbitration Board commenced hearings in Chicago, Ill., on December 8, 1947, and rendered its award December 17, 1947.

The questions submitted to arbitration comprised five proposals respecting changes in rates of pay, rules, and working conditions for guard personnel. In its award the arbitration board sustained the request of the organization for an additional holiday on Washington's birthday, awarded shift differentials for afternoon and night shifts, and concluded that guard personnel should be placed on the same basis as mechanics as regards salary continuance, as proposed by carrier. It also provided longevity pay rates and awarded an increase of 16 cents per hour effective December 15, 1947. Carrier arbitrator dissented to all awards with exception of salary continuance item.

After the award was issued, a dispute arose between the parties concerning the duration of the agreement to be entered into by the parties on the arbitrated issues. The previous agreement had expired August 1, 1947, and the parties were unable to agree whether August 1, 1948, or December 15, 1948, should be the terminal date of the agreement.

The Arbitration Board was reconvened and met in Chicago, Ill., on February 27, 1948, and decided that it was without jurisdiction to indicate a terminal date but recommended that if the parties cannot agree upon a date of termination of the agreement, the date should be made to conform to the awards of the Arbitration Board and be subject to opening under the Railway Labor Act. Mr. John O. Parker dissented in part and reserved the right to indicate the reasons for dissenting and later to write a dissenting opinoin.

CASE A-2641, ARB. 100, INTERPRETATION AND APPLICATION.—Mid-Continent Airlines, Inc., and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

The members of the Arbitration Board were Mr. Sidney L. Cahn of New York, N. Y.; Mr. Victor A. Kropff, assistant to the president, Mid-Continent Airlines, Inc.; and Mr. Harry R. Lyons, vice president of the Brotherhood of Railway and Steamship Clerks, representing the organization. The party arbitrators being unable to agree upon a neutral, the National Mediation Board appointed Mr. Sidney L. Cahn as the neutral member and he was elected as chairman of the board.

The question in dispute involved employees' request that the rates of pay of all employees repersented by the organization be increased 50 cents per hour for hourly rated employees and \$86.67 per month for employees on monthly basis. Arbitration hearings commenced in Kansas City, Mo., on January 6, 1948.

In its award, dated January 14, 1948, the Arbitration Board awarded a wage increase of 17 cents per hour for hourly rated employees and \$29.47 per month for employees paid on a monthly basis, retroactive to and including the pay-roll period last preceding the date of the award.

The parties were unable to resolve a dispute concerning the application of the award to a group of approximately 25 employees known as "stores personnel," who had previously received an increase of 12 cents per hour while represented by another organization. The Arbitration Board was reconvened on April 13, 1948, in Chicago, Ill., and oral argument was heard. The board rendered its interpretation and application of award on April 16, 1948, awarding an increase of 10 cents per hour for "stores personnel" beginning January 1, 1948, to which the organization arbitrator dissented.

The organization later petitioned the District Court of the United States for the Western District of Missouri, to impeach and set aside the interpretation and application of award, as not authorized by the statute, and it was so ordered by the court on August 9, 1948.

CASE A-2626, ARB. 101.—Chicago, Burlington & Guincy Railroad Co. and The Order of Railroad Telegraphers

Members of the Arbitration Board were Dr. William H. Spencer of the University of Chicago, Chicago, Ill.; Mr. J. E. Wolfe, assistant to vice president, Chicago, Burlington & Quincy Railroad Company; and Mr. B. M. Kinkead, vice president of The Order of Railroad Telegraphers. The party arbitrators designated Dr. William H. Spencer as the neutral member and chairman of the board.

The question submitted to arbitration was the request for an increase of 20 cents an hour for manager-wire chiefs, wire chiefs and assistant wire chiefs, to be made effective October 1, 1945. Arbitration hearings were commenced in Chicago, Ill., on January 26, 1948, and the award was dated February 2, 1948. In its award the Arbitration Board granted an increase of 5 cents an hour, effective October 1, 1945. The organization arbitrator dissented from this award.

CASE A-2737, ARB. 102.—Transcontinental & Western Air, Inc., and Transport Workers Union of America

Members of the Arbitration Board were Mr. Frank M. Swacker, attorney, of New York, N. Y.; Mr. W. K. Jacks, director of international operations of the carrier; and Mr. Maurice H. Forge, international vice president of the organization. The party members designated Mr. Frank M. Swacker as the neutral arbitrator of the board and to serve as chairman.

The questions in dispute involved hours of service, compensation, overtime, and vacations for navigators. The arbitration hearings were held in New York ,N. Y., commencing April 20, 1948, and the award was dated April 27, 1948. In its award, the board denied the proposals of both organization and carrier with respect to hours of service, compensation, and overtime, and in lieu thereof specified monthly rates of pay for the employees involved, with provisions for additional compensation for time flown in excess of certain hours per quarter. The award denied some of the proposals of both carrier and organization regarding vacations, some of the carrier's proposals were granted, and two additional rules with respect to vacations were awarded.

CASE A-2719, ARB. 105.—Union Pacific Railroad Co. and Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, and Brotherhood of Railroad Trainmen

Members of the Arbitration Board were Mr. Robert O. Boyd, attorney, of Portland, Oreg.; Mr. A. McAllister, superintendent of Oregon division, Union Pacific Railroad; and Mr. W. B. Hawkins, general chairman, Brotherhood of Locomotive Firemen and Enginemen, representing the organizations. The party arbitrators being unable to agree upon the neutral member, Mr. Robert O. Boyd was appointed by the National Mediation Board as the neutral member and he was elected to act as chairman of the Arbitration Board.

The question in dispute was the right of the carrier to place in effect the establishment of Kenton yard office as the point for beginning and ending day of yard crews. Arbitration hearings were held in Portland, Oreg., commencing March 22, 1948, and the award was dated April 5, 1948. In its award, the Arbitration Board decided that the carrier had the right to make effective the proposed change. A dissenting opinion was made by the organization arbitrator.

CASE A-2625, ARF. 106.—The New York Central Railroad Co. (Buffalo and East) and The Order of Railroad Telegraphers

Members of the Arbitration Board were Dr. William M. Leiserson, of Washington, D. C.; Mr. W. G. Abriel, manager of personnel, New York Central System; and Mr. N. D. Pritchett, deputy president of the Order of Railroad Telegraphers. The party arbitrators designated Dr. William M. Leiserson as the neutral member of the board and he was elected to act as chairman.

The questions in dispute included the matter of incorporating certain additional positions in the working agreement between the parties and several rules changes. Arbitration hearings were held in New York City from May 11 to June 9, inclusive, 1948, and the record consists of 3,491 pages and 253 exhibits. The board made its award on June 24, 1948. In its award the arbitration board decided that certain freight agents should be included in the new agreement and granted some other changes in the scope rule. The board also granted various changes in rules and working conditions, with some modifications.

CASE A-2777, ARB. 107.--Society of Airline Meteorologists and Northwest Airlines, Inc.

The arbitration agreement in this case was signed by the parties on March 24, 1948, and Mr. A. E. Floan, vice president and secretary of the Northwest Airlines, was appointed as carrier arbitrator; and Mr. B. F. Napheys, Jr., attorney, of Denver, Colo., was named as organization arbitrator. Mr. Frank M. Swacker, attorney, of New York, N. Y., was selected by the parties to serve as neutral arbitrator and certificate of his appointment was dated June 16, 1948. Prior to the commencement of arbitration proceedings, however, the dispute was withdrawn from arbitration by agreement of the parties on June 25, 1948.

CASE A-2768, ARB. 108.—Airline Meteorologists Association and Pan American Airways, Inc.

Members of the Arbitration Board were Mr. Russell Wolfe of Philadelphia, Pa.; Mr. W. O. Snyder of Long Island City, N. Y., company arbitrator; and Mr. B. F. Napheys, Jr., of Denver, Colo., arbitrator for the organization. The party members designated Mr. Russell Wolfe as the neutral arbitrator and chairman of the board.

The issue submitted to arbitration in this case concerned an increase of compensation for meteorologists. Arbitration hearings were commenced on May 10, 1948, in Long Island City, N. Y., and the award was dated June 18, 1948, an extension of time having been signed by both parties to the arbitration agreement. In its award the Arbitration Board granted certain increases in rates of pay for these employees to be effective May 15, 1948.

2. EMERGENCY BOARDS-SECTION 10, RAILWAY LABOR ACT

If a dispute between a carrier and its employees is not adjusted and should, in the judgment of the Mediation Board, threaten substantially to interrupt interstate commerce to a degree such as to deprive any section of the country of essential transportation service, the Mediation Board is required, under section 10 of the act, to notify the President, who may, in his discretion, create a board to investigate and report respecting such dispute within 30 days.

After the creation of such board, and for 30 days after its report has been made to the President, no change, except by agreement, may be made by the parties to the controversy in the conditions out of which the dispute arose.

During the fiscal year 1948, 16 such emergency boards were created by the President. A summary of the reports of these boards follows:

CASE A-2551, EMERGENCY BOARD NO. 46.—Brotherhood of Locomotive Firemen and Enginemen and Order of Railway Conductors of America and Bingham and Garfield Railway Co.

An Executive Order of the President dated May 16, 1947, resulted in the appointment of a board composed of Hon. H. Nathan Swaim, former judge of the Supreme Court of Indiana, Indianapolis, Ind.; Hon. George E. Bushnell, judge, Supreme Court of Michigan, Detroit, Mich.; and Hon. Joseph L. Miller of Washington, D. C.

Washington, D. C. The board selected Judge Swaim as chairman. Public hearings were held in Salt Lake City, Utah, beginning May 26, 1947, and concluding June 3, 1947. On June 4, 1947, a recess was taken and, at the request of the parties, the President extended the life of the board 30 days. The parties met with the board at Washington on July 14, 1947. The board's report to the President was dated July 16, 1947.

The dispute arose over the construction of the Copperton Line, a plant facility railroad, to replace the Bingham & Garfield Railway. The issues arising from this transfer of ore haulage involve the rights of the Bingham & Garfield employees under their existing contracts, as well as the future application of the Railroad Retirement Act, the Fair Labor Standards Act, and the Railway Labor Act to the plant facility operation.

The board's report recommended that the parent company; i. e., Kennecott Copper Corp., the carrier, and its employees through their designated bargaining agencies immediately establish mutual agreements by collective bargaining processes so that the transition from common carrier to the new low line plant facility—the Copperton Line—be clear-cut and final, and in the event an agreement is reached, it was further recommended by the Board that the employees join with the carrier in seeking an early abandonment of the Bingham & Garfield Railway Co. carrier operations.

CASE A-2602, EMERGENCY BOARD NO. 47.—Brotherhood of Locomotive Engineers and Southern Pacific Co. (Pacific Lines), Northwestern Pacific Railroad Co., San Diego & Arizona Eastern Railway Co.

An Executive order of the President dated July 18, 1947, resulted in the appointment of a board composed of Col. Grady Lewis, attorney, Washington, D. C.; Mr. Leverett Edwards, attorney, Oklahoma City, Okla.; and Dr. Paul A. Dodd, director of Institute of Industrial Relations, University of California, Los Angeles, Calif.

The board selected Colonel Lewis as chairman. Public hearings were held in San Francisco, Calif., beginning July 23, 1947, and concluding July 30, 1947. The board's report to the President was dated July 30, 1947.

The dispute in this case involved some 498 separate items, which were incorporated in a strike ballot. The first 20 cases of the ballot affected rules and working conditions; the remaining cases were made up of time claims, grievances, run-around, and claims of like nature that had arisen in the application of the working agreement in effect on the carriers, accumulated from 1938 to and through 1945, which were properly referable to the National Railroad Adjustment Board.

Although Section 10 of the Railway Labor Act provides that after the creation of an emergency board and for 30 days after such board has made its report to the President, no change except by agreement shall be made by the parties to the controversy in the conditions out of which the dispute arose, the employees withdrew from service for 6 hours on July 21, 1947, when an agreement was reached which resulted in a return to work and "indefinite postponement of the strike." This agreement also provided for disposition of the remaining items by direct negotiations of the parties.

The emergency board found that the strike took place in violation of the Railway Labor Act, and could have been avoided had the machinery established in the act been utilized in good faith by both parties.

The board specifically recommended that the working agreements between the parties be amended to limit the length of time an alleged violation of the agreements may be handled on the property before final adjustment, and that the First Division of the National Railroad Adjustment Board amend its rules to require a fully reasoned opinion on each award made, to the end that the awards, when so made, may be used as a precedent by the parties at interest in their administrative application of such awards.

The board further recommended that all claims remaining on the strike ballot and not disposed of by direct negotiations be submitted to the First Division of the National Railroad Adjustment Board for final disposition, and that the call for strike action be unqualifiedly cancelled.

CASE A-2449, EMERGENCY BOARD NO. 48.—Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Terminal Railroad Association of St. Louis

An Executive order of the President, dated July 31, 1947, resulted in the appointment of an emergency board consisting of Hon. Leif Erickson, former judge, Supreme Court of Montana, Helena, Mont.; Hon. Eugene L. Padberg,

judge, Supreme Court of Missouri; and Mr. Andrew Jackson, labor relations consultant, New York, N. Y. The board selected Judge Erickson as chairman. Public hearings were held

The board selected Judge Erickson as chairman. Public hearings were held in St. Louis, Mo., beginning August 8, 1947, and concluding August 18, 1947. The board's report to the President was dated August 19, 1947.

This dispute involved two working rules dealing with the method of payment for Sunday work and for payment for service of less than 8 hours by employees called to perform service on assigned rest days, Sundays, and holidays.

The board recommended the continuance of the existing rule providing method of payment for Sunday work, that rule being the standard in effect on practically all railroads and terminals, but recommended the elimination of the note appended to that rule which excepted employees in the baggage-and mail-handling departments from certain provisions contained in the standard rule.

Adoption of the employees' proposed rule with slight modifications providing for payment of eight hours at time and one-half for employees called to perform service on their rest day or on Sundays and designated holidays was also recommended by the board.

CASE A-2542, EMERGENCY BOARD No. 49.—Brotherhood of Railroad Trainmen and River Terminal Railway Co.

The Executive order dated August 1, 1947, resulted in the appointment of a board composed of Mr. Frank M. Swacker, attorney, New York, N. Y.; Dr. Hugh B. Fouke of Painesville, Ohio; and Judge Sidney St. F. Thaxter, of the Supreme Court of Maine, Portland, Maine.

Supreme Court of Maine, Portland, Maine. The board selected Mr. Swacker as chairman. Public hearings and conferences were held in Cleveland, Ohio, beginning August 11, 1947, and concluding August 19, 1947. The board's report to the President was made on August 20, 1947.

The dispute in this case concerned certain changes in the working rules and conditions, and demands of the Brotherhood for premium rate of pay similar to that enjoyed on certain other railroads controlled by steel companies (as is this carrier).

After conclusion of testimony, the emergency board undertook mediation between the parties, as a result of which direct negotiations were resumed under the auspices of the emergency board. These efforts resulted in an agreement granting a premium of $6\frac{1}{2}$ cents per hour in the wage rate, and holding in abeyance the request for rules changes until after the settlement of the national rules movement then in progress.

CASE A-2584, EMERGENCY BOARD No. 50.—International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America and Railway Express Agency, Inc.

An Executive order of the President dated September 15, 1947, resulted in the appointment of an emergency board consisting of Mr. Leverett Edwards, attorney, Oklahoma City, Okla.; Hon. H. Nathan Swaim, former judge of the Supreme Court of Indiana, Indianapolis, Ind.; and Mr. Norman J. Ware, labor relations consultant, Hartford, Conn.

The board selected Mr. Leverett Edwards as chairman. Public hearings and conferences were held in New York City, N. Y., beginning September 24, 1947, and concluding on October 8, 1947. The board's report to the President was made on October 13, 1947.

The issues involves in this dispute were the demand for a 40-centper-hour increase in wages of express drivers in the cities of Cincinnati, Cleveland, Newark, Philadelphia, St. Louis, San Francisco, and Chicago, and the request of the organization for a 20-percent differential for night-shift work.

The board recommended that the employees involved accept an increase of 15½ cents per hour, retroactive to September 1, 1947. This increase was in line with recent wage increase awarded to nonoperating employees of most of the Nation's railroads and had been extended by agreement to the majority of the employees of the Railway Express Agency, but had been refused by the employees here involved. The board also recommended that the 20-percent differential for night-shift work be not granted.

CASE A-2661, EMERGENCY BOARD No. 51.-Brotherhood of Locomotive Engineers and Atlanta & West Point Rail Road Co. and Western Railway of Alabama

An Executive order of the President dated October 15, 1947, resulted in the appointment of a board composed of Hon. Ernest M. Tipton, justice, Supreme Court of Missouri, Jefferson City, Mo.; Hon. Harry H. Schwartz, former member of the National Mediation Board, Casper, Wyo.; and Mr. John T. McCann,

Judge Tipton was selected by the board as chairman. Public hearings were beld in Atlanta, Ga., beginning October 23, 1947, and concluding October 29, 1947.
 The board made its report to the President on November 1, 1947.
 During the hearings, the Brotherhood of Locomotive Firemen and Enginemen,

on its motion, was permitted to intervene as a party to the proceedings.

The dispute in this case involved question of seniority rights of engineers employed by the carriers, in two cases pending on the docket of the First Division, N tional Railroad Adjustment Board.

The board recommended that claims of this nature should be decided by the First Division of the National Railroad Adjustment Board, as contemplated by the Railway Labor Act. The board also found that both of the claims of the Brotherhood of Locomotive Engineers in this dispute were without merit and recommended that the strike authorized by the members of that organization on the carriers' property be canceled.

CASE A-2684, EMERGENCY BOARD No. 52.—Locals 459 and 808, International Brotherhood of Teamsters, Chauffeurs, Warehousemen. and Helpers of America, A. F. of L. and Railway Express Agency, Inc.

An Executive order of the President dated October 21, 1947, resulted in the appointment of an emergency board consisting of Mr. Arthur S. Meyer, chairman of the New York State Board of Mediation, Mr. Frank M. Swacker, attorney, and Mr. Aaron Horvitz, all of New York, N. Y.

The board selected Mr. Meyer as chairman. Public hearings were held in New York City, commencing October 27, 1947, and concluded on December 1, 1947. The board's report to the President was made on January 15, 1948, two extensions of 30 days each having been granted.

The dispute in this case involved 4,700 vehicle and garage employees in the New York metropolitan area in their request for changes in rates of pay, working rules, and conditions of the local agreement, and agency proposals for changes in working rules.

Through mediation efforts of the board, 62 contested matters were disposed of, among which was the agreement to establish Board of Adjustment procedures for arbitration of grievances under the local agreement.

In its report, the board recommended a general wage increase of 15½ cents per hour retroactive to September 1, 1947, with a staggered 5-day, 40-hour week, Monday to Saturday (replacing the 6-day, 44-hour workweek), and an additional 5 cents per hour wage adjustment upon installation of the reduced workweek. The board recommended against making Saturday a penalty day, and against liberalization of vacation and holiday allowances and establishment of a night-shift differential.

The board disclaimed creation of a precedent for other areas or other classes of employees, pointing out that its conclusions were based on the conditions that prevail in the New York metropolitan area.

CASE A-2518, EMERGENCY BOARD No. 53.—Brotherhood of Locomotive Firemen and Enginemen and Georgia Railroad

An Executive order of the President dated December 16, 1947, resulted in the appointment of an emergency board composed of Mr. Floyd McGown, attorney, of San Antonio, Tex.; Hon. Eugene L. Padberg, judge, Supreme Court of Missouri; and Mr. John T. McCann, attorney, of New York, N. Y. Mr. McGown was selected by the board as chairman. Public hearings were

held in Atlanta, Ga., beginning January 13, 1948, and concluding January 19, 1948. The board made its report to the President on January 20, 1948.

The dispute in this case involved claims concerning seniority status and changes in working conditions.

During the hearings, the Brotherhood of Locomotive Engineers, on its motion to intervene, was granted leave to participate in the hearing.

At the suggestion of the board, the parties engaged in extensive efforts to settle the dispute and, on January 19, 1948, they reached an agreement disposing of all issues. No formal recommendations, therefore, were made by the board.

CASE A-2711, EMERGENCY BOARD No. 54.—17 Cooperating Railway Labor Organizations (nonoperating) and Alabama, Tennessee and Northern Railroad Co., et al.

An Executive order signed by the President on December 31, 1947, resulted in the appointment of a board composed of Col. Grady Lewis, attorney, of Wash-

the appointment of a board composed of Col. Grady Lewis, attorney, of wash-ington, D. C.; Dr. Hugh B. Fouke of Painesville, Ohio; and Hon. Andrew Jackson, labor relations consultant, New York, N. Y. The board selected Col. Grady Lewis as chairman. Public hearings were held in Washington, D. C., beginning January 6, 1948, and concluding January 22, 1948. The board's report to the President was made on January 28, 1948.

The issue involved in this case was the application of the general wage increase of 15½ cents per hour, the so-called national pattern resulting from an arbitration award effective September 1, 1947, to employees of 18 short-line railroads represented by various of the 17 cooperating railway labor organizations (nonoperating).

The report of the board, with few exceptions, adhered to the terms of the arbitration award and recommended that the increase be made retroactive to September 1, 1947. As to the exceptions, the board pointed out that the existence of a so-called pattern could not operate as a substitute for genuine collective bargaining on the property between any carrier and its employees as contemplated by the Railway Labor Act.

CASE A-2693, EMERCENCY BOARD NO. 55.-International Union of Amalgamated Association of Street Electric Railway and Motor Coach Employees of America and Chicago, North Shore and Milwaukee Railway Co.

An Executive order of the President dated January 13, 1948, resulted in the apointment of a board consisting of Hon. Harry H. Schwartz, former member of the National Mediation Board, of Casper, Wyo.; Mr. Russell Wolfe, attorney, of Philadelphia, Pa.; and Professor Robert E. Stone, of the College of Business Administration, Syracuse University, Syracuse, N. Y. The board selected Mr. Schwartz as chairman. Public hearings were held in Chicago, Ill., beginning January 19, 1948, and concluding February 7, 1948, an adjournment from January 20th to February 2d having been granted at request of the organization. The board's report to the President was dated February 14, 1948.

This case involved demands for changes in rules and working conditions and a 20-cent increase in wage rates. In its report, the board recommended the allowance of an increase of 15½ cents, retroactive to September 1, 1947. It also recommended adoption of the requested rules changes with respect to sick leave, vacations, and holidays and premium pay, with some modifications. The denial of one demand affecting mechanical department keymen was recommended by the board.

CASE A-2665, EMERGENCY BOARD No. 56.—Brotherhood of Railroad Trainmen and Akron & Barberton Belt Railroad

An Emergency Board composed of Mr. Robert W. Woolley, attorney, of Washington, D. C.; Mr. Huston Thompson, attorney, Washington, D. C.; and Professor Walter Gellhorn, Columbia University Law School, New York, N. Y.; was appointed by the President, pursuant to Executive order dated January 13, 1948.

The board selected Mr. Woolley as chairman. Public hearings were held in Akron, Ohio, beginning January 20, 1948, and concluding January 23, 1948. The board's report to the President was dated January 29, 1948.

During the proceedings before the emergency board, and under its auspices, the parties were able to reach agreement concerning five of the six working rules in dispute. The board recommended against the adoption of this remaining rule which had reference to air-hose work.

CASE A-2705, EMERGENCY BOARD NO. 57.—Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen & Enginemen, and Switchmen's Union of North America and Akron, Canton & Youngstown Railroad Co. and other carriers

2

An Executive order of the President dated January 27, 1948, resulted in the appointment of an emergency board composed of Dr. William M. Leiserson, labor relations consultant and former member of the National Mediation Board, of Washington, D. C.; Hon. George E. Bushnell, chief justice, Supreme Court of Michigan, of Detroit, Mich.; and Prof. W. Willard Wirtz, professor of law, Northwestern University, Winetka, Illinois. Doctor Leiserson was designated by the President to be chairman.

Public hearings were held from February 2 to March 10, 1948, in Chicago, Ill., and subsequently conferences were held with representatives of the parties in an effort to settle the issues, without success.

By agreement of the parties and approved by the President, an extension of time to March 27, 1948, was granted, for submitting report and recommendations to the President. The record in this case consisted of 33 volumes, 6,825 pages, and more than 130 exhibits.

This Nation-wide dispute, affecting practically all railroads of the country, involved demands for 30 percent wage increase with a minimum raise of \$3 a day for approximately 150,000 employees represented by the 3 organizations. The dispute also involved approximately 37 proposed changes in rules or working conditions, some proposed by the carriers and some by the organizations.

With respect to the increase in basic rates of pay, the board recommended an increase of $15\frac{1}{2}$ cents per hour or \$1.24 per day, retroactive to November 1, 1947. The board stated that, in making this recommendation, it relied heavily on the fact that all other railroad employees had already accepted 15½ cents; about 1,000,000 nonoperating employees having been granted this amount by an Arbitration Board in September 1947, and 250,000 conductors and trainmen having settled for the same amount in December 1947, by mutual agreement. The board held that the case of the engineers, firemen, and switchmen was only the unsettled remainder of a single wage case involving all operating employees, which was started in 1947, and was not part of the 1948 "third round" of wage increases which some other industries had already granted.

The dispute about working rules dated back to 1945, which was a factor in the 3-day national railroad strike of two brotherhoods in 1946. The strike settlement at that time provided a moratorium of a year on the rules question. This moratorium expired in June 1947, at which time the carriers and the organizations proposed numerous changes. All the 37 working rules were covered in detail in the emergency board's report, and recommendations were made on each of the issues.

The most important rules were those dealing with working conditions for yard service employees, and for these the board recommended adjustments designed to remove inequities. There was also an adjustment for road men on locomotives weighing less than 140,000 pounds. In suburban commuter service, an average single rate of pay was fixed to take care of variations in the size of trains. Other recommendations dealt with delays at terminals, deadheading, overtime work, minimum guarantees, et cetera. The board refused to recommend extra pay for night shifts, or Sunday and holiday work.

The board, in a concluding statement, protested the fact that so many individual working rules issues had been left unresolved by the parties in their collective bargaining, and urged that the cooperative element in the relationship of the parties be revitalized by working out satisfactory settlements of those issues which are not questions of principle but are conflicting arguments about a lot of little details, and which cannot, in the board's judgment, be disposed of properly in emergency board procedure.

EMERGENCY BOARD No. 58 (no case number).—Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, and Brotherhood of Railroad Trainmen and Terminal Railroad Association of St. Louis

An Executive order of the President dated March 18, 1948, resulted in the appointment of an emergency board consisting of Mr. Frank M. Swacker, attorney, of New York City; Hon. James H. Wolfe, justice, Supreme Court of Utah, Salt Lake City, Utah; and Mr. George Cheney, labor consultant, of San Diego, Calif.

The board selected Mr. Frank M. Swacker as chairman. Public hearings were held in St. Louis, Mo., beginning March 31, 1948. The board's report to the President was dated April 7, 1948.

The dispute concerned interpretations of awards issued by the National Railroad Adjustment Board with respect to back pay for wrongfully discharged switchmen, with which interpretations the organizations were dissatisfied. The board pointed out that it could not properly review the action of the Adjustment Board and indicated that the organizations had a remedy to review such action in the United States district court. The emergency board stated a strike in an effort to change the results in the cases would be utterly unjustifiable, and recommended negotiation of a new rule to govern future cases.

CASE A-2685, EMERGENCY BOARD NO. 59.—International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, A. F. of L. and Railway Express Agency, Inc.

An Executive order of the President dated March 25, 1948, resulted in the appointment of a board composed of Dr. John A. Lapp, industrial relations consultant, Chicago, Ill.; Mr. John T. McCann, attorney, New York, N. Y.; and Mr. John D. Galey, attorney, Sweet Home, Oreg. The board selected Doctor Lapp as chairman. Public hearings were held in

The board selected Doctor Lapp as chairman. Public hearings were held in Chicago, Ill., beginning March 30, 1948, and concluding April 21, 1948. The board's report to the President was dated April 29, 1948.

This dispute involved vehicle employees of the Express Agency in Chicago, Ill.; Cincinnati and Cleveland, Ohio; Newark, N. J.; Philadelphia, Pa.; St. Louis, Mo.; and San Francisco, Calif., approximately 3,200 in number. During the course of the proceedings, 47 of the disputed issues were adjusted by agreement of the parties, leaving the question of reduction of the workweek to 40 hours and the extension of vacation benefits, to the action of the emergency board.

The board recommended that the organization's proposal for a 5-day, 40-hour week be withdrawn as not timely and contrary to the pattern and accepted practice in working hours for the majority of agency employees. The board also recommended an extension of vacation privileges, retroactive to January 1, 1947.

CASE A-2779, EMERCENCY BOARD No. 60.—Brotherhood of Railroad Trainmen and Aliquippa and Southern Railroad Co.

An Executive order of the President dated April 10, 1948, created an emergency board to which he appointed Hon. Sidney St. F. Thaxter, associate justice, Supreme Judicial Court of Maine; Mr. Leverett Edwards, attorney, Oklahoma City, Okla.; and Mr. Aaron Horvitz of New York City, N. Y.

Judge Thaxter was selected by the board as chairman. Public hearings were held in Pittsburgh, Pa., commencing April 19, 1948, and concluding April 30, 1948. The board's report to the President was dated May 17, 1948.

The dispute in this case arose over the refusal of the carrier to negotiate with representatives of the employees respecting changes in contract covering rates of pay and working conditions, the refusal being based upon a moratorium for a period of 2 years from August 11, 1947, provided for in a contract between the carrier and another organization previously representing these employees.

The board recommended that the carrier forego what it insisted is its legal right not to negotiate with its employees, and that both sides sit down together and attempt to iron out their differences between themselves, in the spirit of the Railway Labor Act.

A majority of the board also recommended that, after such attempt, should there be fundamental differences still between them, they submit the unresolved issues to arbitration.

CASE A-2791, EMERGENCY BOARD NO. 61.—Brotherhood of Locomotive Firemen and Enginemen and Pennsylvania Railroad Co.

An Executive order of the President dated April 10, 1948, resulted in the appointment of a board composed of Mr. Andrew Jackson, labor relations consultant, New York, N. Y.; Hon. James H. Wolfe, justice, Supreme Court of Utah, Salt Lake City, Utah; and Prof. E. Wight Bakke, New Haven, Conn. Mr. Andrew Jackson was selected by the board as chairman. Public hearings

Mr. Andrew Jackson was selected by the board as chairman. Public hearings were held in Philadelphia, Pa., and, after the end of the second week, in New York, N. Y., from April 20, 1948, to May 25, 1948. The record in this case consists of 2,416 pages of testimony and 61 exhibits. The board's report to the President was dated June 9, 1948, an extension of time to that date having been authorized by the President. During the course of the hearings, one of the seven issues in this dispute was withdrawn by the organization, to be processed through the First Division of the National Railroad Adjustment Board, and three of the issues were settled by agreement of the parties through mediation efforts of the board.

With respect to the three issues remaining in the dispute, the board recommended that the carrier employ a fireman or helper on Diesel electric locomotives in yard service; that the claims for extra pay in handling trains over inspection pit be denied; and that no action be required by the carrier in connection with reinstatement of certain demoted minor supervisors, but suggested that the carrier reconsider its position in this disciplinary action in the light of certain matters set forth in the report.

CASE A-2707, EMERGENCY BOARD No. 62.—Air Line Pilots Association, International, and International Association of Machinists and National Airlines, Inc.

An Executive order of the President dated May 15, 1948, resulted in the appointment of a board composed of Col. Grady Lewis, attorney, of Washington, D. C.; Prof. Walter V. Schaefer of Northwestern University, Chicago, Ill.; and Judge Curtis W. Roll of Indiana. Colonel Lewis was.selected by the board as chairman. Public hearings were

Colonel Lewis was selected by the board as chairman. Public hearings were held in Washington, D. C., from May 25, 1948, through June 4, 1948, on the issues in dispute between the carrier and the Air Line Pilots Association, International. On June 3, 1948, an amendatory Executive order was issued which directed the inclusion of a dispute between the carrier and the International Association of Machinists. Hearings recessed on June 4, 1948; resumed June 21, 1948, concluding July 1, 1948. An extension of time until July 30, 1948, within which the board's report may be filed was allowed by the President. Therefore, summary of the board's report will be carried in annual report for fiscal year ending June 30, 1949.

3. EMERGENCY BOARDS-NATIONAL RAILWAY LABOR PANEL

The National Railway Labor Panel was created in 1942 under authority of Executive Order 9172, to supplement procedures of section 10 of the Railway Labor Act, during the period of the wartime emergency. Thus, panel emergency boards were provided in cases where no strike votes were taken but where the disputes were not settled under the provisions of sections 5, 6, 7, 8, and 9 of the Act.

In recognition of the fact that procedures of the act are now adequate for the handling and adjustment of such disputes, the President revoked Executive Order 9172 by issuance of Executive Order 9883 on August 11, 1947.¹

The National Railway Labor Panel operated from May 22, 1942, to August 11, 1947, and during this period provided 58 emergency boards. Except in a few cases the recommendations of these boards were accepted by the parties in settlement of the dispute.

¹ Text of Executive Order 9883 in appendix D. For text of Executive Order 9172 see annual report for fiscal year 1947.

VI. WAGE AND RULE AGREEMENTS

The Railway Labor Act places upon both the carriers and their employees the duty of exerting every reasonable effort to make and maintain agreements governing rates of pay, rules, and working conditions. The number of such agreements in existence indicates the wide extent to which this policy of the act has become effective on both rail and air carriers.

J. AGREEMENTS COVERING RATES OF PAY, RULES, AND WORKING CONDITIONS

Under section 5, third (e), all carriers subject to the Railway Labor Act are required to file with the National Mediation Board copies of all their agreements with employee representatives governing rates of pay, rules, and working conditions. As of June 30, 1948, there was on file with this Board a total of 5,002 such agreements, or an increase of 65 new agreements received during the year. Of this increase, 23 new agreements cover air-line employees and the remainder are applicable to railroad employees. Table 12 shows for the 14-year period 1935-48 the number of agreements filed with the Board, subdivided by classes of carriers, and by types of labor organizations.

Types of labor organiza- tions and fiscal years	All` carriers	Class I	Class II	Class III	Switch- ing and termi- nal	Elec- tric	Express and pull- man	laneous	Air- line carriers

In addition to the formal agreements recorded in table 12, the Board also receives each year many supplemental agreements and amendments to existing agreements. During the fiscal year ended June 30, 1948, a total of 1,335 such revisions and supplements was filed with the Board. Of this total 1,316 were revised or amended agreements.

Two of the supplemental agreements received during the year provided for the transfer of existing agreements from one organization to another, after changes in employee representation. Adding the 1,335 revised and supplemental agreements to the 65 new basic agreements produces a total of 1,400 agreements of all types received in the Board's office during the fiscal year 1948.

2. CLASSES OF EMPLOYEES COVERED BY AGREEMENTS

Table 13 shows the extent of coverage by collective-bargaining agreements for the various crafts or classes of employees on the principal rail carriers of the United States. The data in this table summarize the detailed information for the individual carriers shown in table 14, and indicate the breadth of the scope of representation by the various national labor organizations.

3. AGREEMENTS ON PRINCIPAL CARRIERS

Tables 14-A and B present a summary of the collective bargaining agreements in effect as of June 30, 1948, on carriers subject to the Railway Labor Act. It will be noted that table 14-A is devoted to agreements on class I railroads while table 14-B summarizes agreements in effect on the Pullman Co. and the Railway Express Agency, Inc. Similar information respecting labor agreements on the major scheduled air lines subject to the Railway Labor Act is presented in table 14-C.

Opposite the name of each carrier shown in the tables are given the initials of the name of the organizations holding the agreement for each craft or class of employees. National organizations are shown by the initials of their names, local unions by the designation "LU," and system associations by the letters "SA." The tables carry all current agreements for the carriers named which are on file with the Board with effective dates not later than June 30, 1948.

FOOTNOTES TO TABLES 14A AND 14B

56

VII. INTERPRETATION AND APPLICATION OF AGREEMENTS

Agreements or contracts made in accordance with the Railway Labor Act are of two kinds: First, those consummated as a result of direct negotiations between carriers and representatives of their employees establishing rates of pay, rules, and working conditions; second, mediation agreements made by the same parties and also dealing with rates of pay, rules, and working conditions, but consummated with the assistance and under the auspices of the National Mediation Board. These two types of agreements are generally designated respectively as "wage and rule agreements" and "mediation agreements." The meaning, application, or interpretation of these two types of agreements occasionally leads to differences between those who are parties to them.

FOURTH DIVISION

1. INTERPRETATION OF WAGE AND RULE AGREEMENTS

Disputes involving the application or interpretation of agreements made through negotiation between the parties are subject to the jurisdiction of the National Railroad Adjustment Board, under the provisions of section 3 of the Railway Labor Act. How that Board, through its four divisions, discharged its functions during the fiscal year 1948 is described in the report of the Board and the separate reports of the divisions, which are reproduced as appendix A to this report. Table 15, above, is a tabulation of the cases handled by divisions for the years 1935–48. Included in the table for the first time is a recapitulation of the cases handled by the four divisions of the Adjustment Board since its creation during the fiscal year 1935. It will be noted that of the 29,300 cases docketed by the Board since it began operation, 23,241 or 79 percent have been docketed by the First Division.

When the members of any of the four divisions of the Adjustment Board are unable to agree upon an award in any dispute being considered, because of a deadlock or inability to secure a majority vote, they are required under section 3, first (1), of the act to attempt to agree upon and select a neutral person to sit with the division as a member and make an award. Failing to agree upon such neutral person within 10 days, the act provides that this situation may be certified to the National Mediation Board, whereupon the latter body selects the neutral person or referee.

The qualifications of the referee are indicated by his designation in the act as a "neutral person." In the appointment of referees the National Mediation Board is bound by the same provisions of the law that apply in the appointment of arbitrators. The law requires that appointees to such positions must be wholly disinterested in the controversy, impartial, and without bias as between the parties in dispute.

The following tabulation gives the names and residences of all persons appointed for service as referees on the Adjustment Board during the past year.

⁶ Judge Bruce Blake advised members of the Third Division. National Railway Adjustment Board, the the was unable to serve a referee.

that he was unable to serve as referee, thereupon the division selected H. Nathan Swaim in lieu thereof to serve as referee for the 30 cases.

2. INTERPRETATION OF MEDIATION AGREEMENTS

Section 5, second, of the Railway Labor Act provides that controversies arising over the meaning or application of agreements reached through mediation may be resolved by interpretation of such agreements by the National Mediation Board. Either or both of the parties to a mediation agreement may apply to the Board for an interpretation, which must be made within 30 days following a public hearing, at which both parties may present their respective cases.

In making such interpretations, the Board considers only the specific terms of mediation agreements, and not the application of the agreement to specific situations. This restriction on interpretations by the Board is necessary to prevent confusion and overlapping of its responsibilities in this respect with those of the National Railroad Adjustment Board, or any other adjustment board provided for by the law. Section 3 of the act, and section 204 of title II makes it the specific duty of adjustment boards to decide disputes arising out of employee grievances, or out of the interpretation or application of agreement rules.

During the fiscal year 1948, the National Mediation Board interpreted one mediation agreement. This case involved the Missouri Pacific Railroad Co. and the American Train Dispatchers Association. The mediation agreement in controversy was made on November 16, 1945, in the Board's Case A-2181. This agreement governed the operation of centralized traffic control machines by control operators, working under the direction of the train dispatchers. Controversy arose between the parties over two provisions of the mediation agreement, one stating that train dispatchers will keep records prescribed by the carrier which will enable them to know the location of all trains in centralized traffic control territory, record of their consists, and where they have work to do; the other provides that the movement of trains and engines will be directed by the train dispatcher, who will when required to, in the performance of these duties, issue instructions for such movements to the control operator. Following a public hearing as required by the act, the Board's interpretation was made on June 24, 1948. In the interpretation, the Board ruled that the first provision mentioned above means that the carrier shall prescribe records to be kept by train dispatchers which will enable them to know the location of all trains in centralized traffic control territory, record of their consists, and know where they have work to do. The second provision in controversy was interpreted to mean that when employees other than train dispatchers man and operate the control boards of centralized traffic control machines, such employees will handle train and engine movements in the territory in such manner as specifically or generally directed by the train dispatcher.

On August 16, 1947, a joint request was made upon the Board by the Boston & Maine Railroad and System Federation No. 18, Railway Employes' Department, A. F. of L., for the interpretation of certain overtime rules for shopcraft employees, which were made as a result of mediation in Case A-2474. After some investigation of this request with the parties, both of them withdrew their application for an interpretation of the mediation agreement and no formal interpretation was rendered by the Board in this case.

VIII. ORGANIZATION AND FINANCES OF THE NATIONAL MEDIATION BOARD

1. ORGANIZATION

The National Mediation Board replaced the United States Board of Mediation and was established in June 1934 under authority of the Railway Labor Act, as amended.¹

The Board is composed of three members, appointed by the President, by and with the advice and consent of the Senate. The terms of office, except in case of a vacancy due to an unexpired term, are for 3 years, the term of one member expiring on January 31 of each year. The act makes no provision for holding over beyond that date and requires that the Board shall annually designate one of its members to serve as chairman. Not more than two members may be of the same political party. The Board's headquarters and office staff are located in the Federal Works Agency Building, Washington, D. C., at Eighteenth and F Streets NW. In addition to its office staff, the Board has a staff of mediators, who spend practically their entire time in field duty.

Subject to the Board's direction, administration of the Board's affairs is in charge of the secretary. While some mediation conferences are held in Washington by far the larger portion of mediation services is performed in the field. Services of the Board consist of mediating disputes between the carriers and the representatives of their employees over changes in rates of pay, rules, and working conditions. These services also include the investigation of representation disputes among employees and the determination of such disputes by election or otherwise. These services as required by the Act are performed by members of the Board, and its staff of mediators. In addition, the Board conducts hearings when necessary in connection with representation disputes to determine employees eligible to participate in elections and other issues which arise in its investigation of such disputes. The Board also conducts hearings in connection with the interpretation of mediation agreements, and appoints neutral referees and arbitrators as required.

The staff of mediators, all of whom have been selected through Civil Service, is as follows:

Ross R. Barr. Thomas E. Bickers. Clarence G. Eddy. Lawrence Farmer. Ross J. Foran. Patrick D. Harvey. James M. Holaren. Cornelius E. Hurley. Matthew E. Kearney. James P. Kiernan. Warren S. Lane. Albert L. Lohm. Geo. S. MacSwan. Wm. F. Mitchell, Jr. John F. Murray. James E. Newlin. J. Joseph Noonan. Alexander D. Penfold. Wallace G. Rupp. Tedford E. Schoonover. H. Albert Smith. Frank K. Switzer. Eugene C. Thompson. John W. Walsh.

^{1 45} U. S. C. A 151 et seq., 44 Stat. 577

2. FINANCIAL STATEMENT

Accounting of all moneys appropriated by Congress for the fiscal year 1948, pursuant to the authority conferred by "An act to amend the Railway Labor Act approved May 20, 1926" (approved June 21, 1934)

Regular appropriations: Salaries and expenses Printing and binding	\$328, 700 9, 000
Total operating expenses. Salaries and expenses, arbitration and emergency boards Cost of handling penalty mail	167, 800
Grand total	506, 200
Obligations: Salaries, National Mediation Board Expenses incident to travel Printing and binding Other operating expenses	56, 792 9, 000
Total operating expenses Expenses of arbitration, and emergency boards Cost of penalty mail	125, 477
Grand total Unobligated balances:	449, 303
Salaries and expenses, National Mediation Board Expenses of arbitration and emergency boards Cost of penalty mail	42, 323
Total unobligated	56, 921

Annual expenditures for arbitration and emergency boards cannot be accurately budgeted due to fluctuations in the need for such boards. Also, the expenses incurred by such boards vary greatly from year to year, depending upon the nature and extent of the disputes arbitrated or considered by emergency boards. Since the needs for such boards cannot be accurately anticipated, it is necessary to have available adequate funds to meet such contingencies.

3. TABLES OF CASES HANDLED

A summary of the individual mediation and representation cases settled during 1948 is reported in appendices B and C.

APPENDIX A

NATIONAL RAILROAD ADJUSTMENT BOARD

(Created June 21, 1934)

JOHNSON, B. C. JONES, A. H. LAUGHLIN, G. W.³ LOSEY, T. E. MATTHEWS, C. S.⁴ NOELL, W. A.⁵ PECK, C. E. PRINCE, S. R., JR. PURCELL, T. F. RAY, R. F. Sсносн, М. G. Swan, Ó. E. SYLVESTER, J. H. TILLERY, R. J.⁶ WALTHER, A. G. WALTON, R. A. WRIGHT, GEORGE

STATEMENT

On June 21, 1934, by enactment of Public No. 442, Seventy-third Congress, the National Railroad Adjustment Board was created to consider and make awards in the following classes of disputes:

The disputes between an employee or group of employees and a carrier or carriers growing out of grievances or out of the interpretation or application of agreements concerning rates of pay, rules, or working conditions, including cases pending and unadjusted on the date of approval of this act, shall be handled in the usual manner up to and including the chief operating officer of the carrier designated to handle such disputes; but, failing to reach an adjustment in this manner, the disputes may be referred by petition of the parties or by either party to the appropriate divisions of the Adjustment Board with a full statement of the facts and all supporting data bearing upon the disputes.

Accounting of all moneys appropriated by Congress for the fiscal year 1948, pursuant to the authority conferred by "An act to amend the Railway Labor Act approved May 20, 1926" (Approved June 21, 1934)

ORGANIZATION

The First Division of the National Railroad Adjustment Board was established by Congress by amendment (Public, No. 442, 73d Cong.), to the RailwayLabor Act.

Pursuant to and in accordance with section 3, subdivision (u) of said amendment, the First Division was organized on July 31, 1934, by the selection of a chairman,

a vice chairman, and a secretary. The First Division consists of 10 members—5 selected, designated, and paid by the carriers, and 5 selected, designated, and paid by 5 labor organizations of railroad employees, national in scope, in accordance with the provisions of the Railway Labor Act.

JURISDICTION

The First Division took over the work of the four regional train service boards, adding thereto the representation of many carriers not parties to any of the regional boards, and also the Switchmen's Union of North America as parties to the division.

The First Division has jurisdiction over disputes involving train and yardservice employees of carriers; that is, engineers, firemen, hostlers, and outside hostler helpers, conductors, trainmen, and yard service employees.

 ¹ Mr. C. W. Kealey succeeded Mr. Laughlin April 1, 1948.
 ² Mr. Nathan J. Hale succeeded Mr. Carter November 26, 1947.
 ³ Mr. B. C. Johnson succeeded Mr. Rogers May 7, 1947.
 ⁴ Mr. W. C. Keiser succeeded Mr. Tillery April 15, 1948.
 ⁵ Mr. O. E. Swan succeeded Mr. Dwinell September 5, 1947.

JURISDICTION

Second Division: To have jurisdiction over disputes involving machinists, boilermakers, blacksmiths, sheet-metal workers, electrical workers, carmen, the helpers and apprentices of all the foregoing, coach cleaners, powerhouse employees, and railroad-shop laborers. This division shall consist of 10 members, 5 of whom shall be selected by the carriers and 5 by the national labor organizations of the employees.

Report of cases handled by the Second Division, fiscal year ending June 30, 1948

0j	lumber f cases	of	umber cases
Docketed Heard Decided Decided with referee	. 79 . 51	Decided—Continued. Decided without referee Withdrawn Deadlocked	3

In addition to the regular docketed cases, the Second Division has been called upon to handle a substantial volume of potential cases. Many of the communica-tions received were from correspondents asking information as to the method and procedure necessary to properly present cases to the division. Others recite complaints of alleged violations of rules in existing agreements, while others made

an attempt to file cases with the division from properties on which system boards of adjustment exist, and still others presented disputes that may develop into cases that should properly be referred to this division for adjudication. These potential cases, 39 in number, developed during the fiscal year ending June 30, 1948, and in addition much correspondence was carried on in connection

These potential cases, 39 in number, developed during the fiscal year ending June 30, 1948, and in addition much correspondence was carried on in connection with similar potential cases listed in our report of the previous fiscal year. Many of these required special study and consideration which involved a great amount of correspondence and consumed a considerable portion of the time of the division in an effort to secure the information necessary to direct the proper presentation and/or handling of these matters to a conclusion.

The following list shows the parties involved in the potential cases originating during the fiscal year ending June 30, 1948.

R. B. PARKHURST, Executive Secretary

JURISDICTION

Fourth Division: To have jurisdiction over disputes involving employees of carriers directly or indirectly engaged in transportation of passengers or property by water, and all other employees of carriers over which jurisdiction is not given to the First, Second, and Third Divisions. This division shall consist of six members, three of whom shall be selected by the carriers and three by the national labor organizations of the employees (par. (h), sec. 3, first, Railway Labor Act, 1934).

¹ Deceased; replaced by H. E. Greer, April 1, 1948.

APPENDIX D

Title 3—The President

EXECUTIVE ORDER 9883—REVOKING EXECUTIVE ORDER NO. 9172 OF MAY 22, 1942, ESTABLISHING A PANEL FOR THE CREATION OF EMERGENCY BOARDS FOR THE ADJUSTMENT OF RAILWAY LABOR DISPUTES

Whereas Executive Order No. 9172 of May 22, 1942, established for the duration of the war and six months thereafter a National Railway Labor Panel of nine members for the creation of emergency boards for the adjustment of railway labor disputes; and

Whereas it appears that the procedures available under the Railway Labor Act are now adequate for the handling and adjustment of such disputes:

Now, therefore, by virtue of the authority vested in me by the Constitution and the statutes of the United States, it is ordered that the said Executive Order No. 9172 be, and it is hereby, revoked.

HARRY S. TRUMAN.

THE WHITE HOUSE, August 11, 1947.
